INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF UNITED COOPERATIVE ASSURANCE COMPANY (A SAUDI JOINT STOCK COMPANY)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

QUALIFIED OPINION

We have audited the financial statements of United Cooperative Assurance Company (the "Company"), which comprise the statement of financial position as at 31 December 2025, and the statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and notes to the financial statements, comprising material accounting policy information and other explanatory information.

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2025, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements issued by the Saudi Organization for Chartered and Professional Accountants ("SOCPA").

BASIS FOR QUALIFIED OPINION

As disclosed in Note 13 to the financial statements, the Company carries goodwill amounting to SR 78.4 million as at 31 December 2025. Management performed an impairment assessment, with the support of an independent expert, and concluded that no impairment of goodwill is required. In our view, the impairment assessment, in particular the determination of the recoverable amount, was based on market capitalisation without sufficient adjustments or reconciliation and is therefore not consistent with the requirements of IAS 36 Impairment of Assets and IFRS 13 Fair Value Measurement. In addition, limited consideration has been given to value in use based on future cash flows. Consequently, we are unable to agree with management's conclusion that the carrying amount of goodwill is fully recoverable. Accordingly, the carrying amount of goodwill may be materially overstated. The impact of this matter on the financial statements has not been determined.

We conducted our audit in accordance with International Standards on Auditing, that are endorsed in the Kingdom of Saudi Arabia. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards), endorsed in the Kingdom of Saudi Arabia (the "Code"), that is relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with the Code's requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

MATERIAL UNCERTAINTY RELATED TO GOING CONCERN

We draw attention to note 1(d) to the accompanying financial statements which indicates that the Company incurred a net loss of SR 256.22 million for the year ended 31 December 2025 and had accumulated losses of SR 451.84 million as of 31 December 2025. These losses exceeded the Company's share capital as at the year end, and it also reported net operating cash outflows of SR 183.28 million for the year. These events and conditions, along with other matters as set forth in note 1 to the accompanying financial statements, indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF UNITED COOPERATIVE ASSURANCE COMPANY
(A SAUDI JOINT STOCK COMPANY)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the Basis for Qualified Opinion section, we have determined the matter described below to be the key audit matter to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter
Valuation of liability for incurred claims and loss component The estimation of the liability for incurred claims and loss component involves a significant degree of judgment. This entails estimating the present value of future cash flows and risk adjustment for non-financial risk (forming part of liability for incurred claims) and loss component (forming part of liability for remaining coverage). The risk adjustment for non-financial risk is applied to the present value of the estimated future cash flows, and reflects the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows from non-financial risk as the Company fulfils its obligations under insurance contracts. The present value of future cash flows is based on the best-estimate of the ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not. The loss component is recognised if at any time during the coverage period, facts and circumstances indicate that a group of contracts is onerous. Such loss component is remeasured at each reporting date as the difference between the amounts of the fulfilments cash flows determined under the general measurement model relating to the future service and the carrying amount of the liability for remaining coverage without the loss component. As at 31 December 2025, the estimates of present value of future cash flows, risk adjustment for non-financial risk and loss component amount to Saudi Riyals 382.3 million, Saudi Riyals 3.7 million and Saudi Riyals 24.7 million respectively, as disclosed in Note 9 to the financial statements. Accordingly, the complexity arises from calculating the actuarial best estimate using historical data which is sensitive to external inputs, as well as the actuarial methodology that is applied and the assumptions on current and future events.	Our procedures included the following: • Obtained understanding, evaluated the design and implementation of key controls over the accuracy of the claims and related provisions recorded by the Company; • Evaluated the competence, capabilities and objectivity of the management's appointed Actuary based on their professional qualifications and experience and assessed their independence to the Company; • Performed substantive procedures, on a sample basis, on the amounts recorded by the Company for paid and outstanding claims; • Tested, on a sample basis, the integrity of the claims data, including salvage and subrogation recoveries, used as inputs by management and their Appointed Actuary into the actuarial valuations in estimating the present value of the future cash flows, risk adjustment for non-financial risk and loss component; • Engaged our actuarial specialists to assess the reasonableness of the actuarial models and assumptions, including expected loss ratios and expense allocation, used to calculate the present value of the future cash flows (net of salvage and subrogation recoveries), the risk adjustment and loss component, to obtain comfort over the actuarial report issued by management's appointed actuary. Our internal actuarial specialists also performed reprojections of the present value of future cash flows, risk adjustment for non-financial risk and loss component for significant product lines and compared them with the amounts recorded by the management for reasonableness; and

(A SAUDI JOINT STOCK COMPANY)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

KEY AUDIT MATTERS - (CONTINUED)

Key audit matter	How our audit addressed the key audit matter
Valuation of liability for incurred claims and loss component The Company uses an external actuary ("Appointed Actuary") to provide them with the estimate of such liabilities. A range of methods were used to determine these liabilities which were based on a number of explicit or implicit assumptions relating to the expected settlement amount and settlement patterns of claims. We have considered this as a key audit matter due to the inherent estimation uncertainty, complexity and subjectivity involved in the valuation of the estimates of present value of future cash flows, risk adjustment for non-financial risk and loss component arising from insurance contracts. Refer to Notes 3 and 4 for the material accounting policies and significant accounting judgements, estimates and assumptions related to insurance contract liabilities.	• Assessed the adequacy and appropriateness of the related disclosures in the financial statements.

OTHER INFORMATION

Management is responsible for the other information. The other information comprises information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon, The Annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Company's annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF UNITED COOPERATIVE ASSURANCE COMPANY
(A SAUDI JOINT STOCK COMPANY)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS as endorsed in Kingdom of Saudi Arabia, the applicable requirements of the Regulations for Companies, the Company's By-laws and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, i.e., the Board of Directors of the Company are responsible for overseeing the Company's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF UNITED COOPERATIVE ASSURANCE COMPANY
(A SAUDI JOINT STOCK COMPANY)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF FINANCIAL STATEMENTS (CONTINUED)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit of the Company.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF UNITED COOPERATIVE ASSURANCE COMPANY (A SAUDI JOINT STOCK COMPANY)

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Article 20 of the regulation for companies requires that the auditor includes in their report what might come to their attention with respect to non-compliance of the terms of the Company's Bylaws or the regulations for companies. During the course of our current audit of the financial statements, we have noted that, on 11 May 2025, the Company announced that its accumulated losses exceeded 50% of the capital. However, the Board of Directors did not call for an Extraordinary General Assembly meeting within one hundred eighty (180) days to consider the continuation of the Company, taking any necessary measures to address such losses, or its dissolution. This could constitute a violation of the provisions of Article (132) of the regulations for companies. (Note 1 d)

Acting Chief Financial Officer	Acting Chief Executive Officer	Chairman

The accompanying notes from 1 to 36 form an integral part of these financial statements.

1. General information - legal status and principal activities

(a) General information

United Cooperative Assurance Company ("the Company") is a Saudi Joint Stock Company registered in the Kingdom of Saudi Arabia under Commercial Registration No. 4030179955 dated 6 Jamad-al-Thani 1429H, corresponding to 6 June 2008.

The activities of the Company are to transact cooperative insurance and reinsurance operations and related activities in the Kingdom of Saudi Arabia. On 2 Muharram 1430H (31 December 2008), the Company received a license number (NMT/19/200812) from the Saudi Arabia Monetary Authority ("SAMA") now Insurance Authority ("IA") which is currently valid up to 29 Dhul Hijja 1448H corresponding to 4 June 2027 to engage in insurance business in Saudi Arabia. The Company was listed on the Saudi Stock Exchange on 23 May 2007. The Company started its operations on 1 January 2009. The Company is fully owned by the general public and Saudi shareholders.

The registered office address of the Company is:

Al-Narjis District,
Othman Bin Affan Road
Riyadh, Kingdom of Saudi Arabia
Short Address: RAJA7626

(b) Merger agreement

On 23 Dhu al-Hijjah1446H (corresponding to 19 June 2025), the Company signed a non-binding Memorandum of Understanding (MoU) with Arabia Insurance Cooperative Company ("Arabia"), a company incorporated in the Kingdom of Saudi Arabia, to evaluate a potential merger between Arabia and the Company. The Company has announced on 18 September 2025 (corresponding 26 Rabiea Al Awwal 1447H) that it has obtained the non-objection of the General Authority for Competition on the completion of the economic concentration resulting from the potential merger. Subsequent to the reporting date, the Company terminated the MOU and all negotiations related to the proposed merger with Arabia, based on the mutual agreement by the parties on 4 March 2026 (Corresponding to 15 Ramadan 1447H).

(c) Suspension of compulsory insurance policies

On 27 October 2025, IA issued a directive to suspend the issuance and renewal of compulsory insurance policies (including Domestic workers, Medical, and Motor). Subsequent to the year end, on 19 February 2026, IA has issued a decision to suspend the Company from issuing or renewing insurance policies for all motor vehicle insurance products including comprehensive vehicle insurance policies due to non-compliance with certain regulatory requirements primarily related to the Company's liquidity, and settlement mechanisms for payables to policyholders and others. The IA has requested the Company's revised business plan, which should include the corrective measures to address the previously identified regulatory non-compliance. Management prepared the requested plan to ensure that all required corrective actions are implemented to the satisfaction of the IA. Completion of these actions is expected to enable the Company to resume the issuance and/or renewal of all suspended insurance policies from the third quarter of 2026.

(d) Material uncertainty related to going concern

The Company has incurred a net loss of SR 256.22 million for the year ended 31 December 2025, and as of that date, the Company has accumulated losses of SR 451.84 million (31 December 2024: accumulated losses of SR 195.6 million). At the reporting period, the Company's accumulated losses reached 112.96% of its share capital (31 December 2024: 49%), which exceeds the 50% threshold as per Article 3, Part 2 of the CMA guidelines for listed companies. Furthermore, the Company's solvency margin is significantly deteriorated in negative as of 31 December 2025, which is a non compliance with minimum solvency requirements as mandated by the Insurance Authority (IA). In addition, the Company reported net cash outflows from operating activities of SR 183.28 million for the year ended 31 December 2025 (2024: outflows of SR 10.80 million), reflecting the impact of change in insurance and reinsurance contract assets and liabilities, and working-capital pressures on the liquidity.

1. General information - legal status and principal activities (continued)

(d) Material uncertainty related to going concern (continued)

On 11 May 2025, the Company announced on Tadawul that its accumulated losses had reached 54.7% of its share capital. In accordance with Article 132 of the Saudi Companies Law ("the Regulations"), if the losses of a joint-stock company amounted to half of the share capital, the Board of Directors shall, within 60 days from the date of its knowledge thereof, announces the losses and the recommendations relating thereto, and shall, within 180 days from the said date, call for an extraordinary general assembly meeting to consider the continuation of the Company by taking measures necessary to resolve such losses or to dissolve the Company.

As part of this process, the Board of Directors did not disclose its recommendation on the Company's future direction for presentation to the shareholders. The Company was in the process of fulfilling these requirements, and the Extraordinary General Assembly meeting did not held within the said deadline due to unable to obtain a no-objection certificate (NOC) from the Insurance Authority.

Article 68 2(b) of the Implementing Regulations of the Cooperative Insurance Companies Control Law (the "Regulations"), when the solvency margin falls more than 50% of the required margin, the Company shall restore its solvency margin to the required level. If the required solvency margin is not restored to its appropriate level for two consecutive quarters, the Company will be required by the IA to immediately take all or any of the measures, including formulating and providing the Authority with a corrective action plan to be taken, and the period necessary to restore its solvency. The Company received correspondence from IA requiring the Company to submit its rectification measures according to Article 68 of the Regulations.

Underwriting performance during the year, particularly within the motor segment, was adversely impacted by competitive pricing pressures and the recognition of losses on certain onerous contracts. These factors resulted in volatility in underwriting margins and contributed to an increase in accumulated losses. In addition, IA has suspended the Company from issuing or renewing motor insurance policies, including comprehensive motor products, due to non-compliance with certain regulatory requirements, primarily relating to liquidity constraints and delays in settlement of payables to policyholders and other stakeholders (note 1 c).

In response, management engaged an external consultant to assess the Company's ability to continue as a going concern and concluded that the Company has sufficient resources to continue its operations for at least 12 months from the reporting date. Furthermore, the Board of Directors has approved a business plan for the period 2026–2030, which includes key strategic initiatives aimed at addressing accumulated losses and strengthening solvency and liquidity. These initiatives comprise proposed capital restructuring, cost optimization measures, underwriting discipline with a focus on profitable and adequately priced portfolios, and improved receivables and liquidity management. As part of its corrective actions, the Company has also submitted a liability settlement plan to the IA, pursuant to which a significant portion of outstanding claims has been settled. This is expected to support the removal of the suspension on motor insurance activities and assist in restoring regulatory compliance and stakeholder confidence. Additionally, measures have been implemented to address losses in the motor portfolio through revised pricing strategies and portfolio optimization.

Accordingly, these conditions, including recurring losses, negative operating cash flows, and continued solvency deficit, indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. However, the financial statements have been prepared on a going-concern basis, as management expects the combination of the above-mentioned corrective measures will enable the Company to meet its obligations as they fall due. Management continues to monitor all key performance indicators, solvency metrics, liquidity trends, and market conditions, and will update the business plan as necessary to respond to evolving circumstances.

2. Basis of preparation

a) Statement of Compliance

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards that are endorsed in the Kingdom of Saudi Arabia and other standards and pronouncements issued by the Saudi Organization for Chartered and Professional Accountants (SOCPA).

As required by the Saudi Arabian Insurance Regulations (herein referred to as "Insurance Regulations"), the Company maintains separate books of accounts for "Insurance Operations" and "Shareholders' Operations". Insurance Regulations require a clear segregation of assets, liabilities, income and expenses of the insurance and shareholders operations. Accordingly, assets, liabilities, revenues and expenses attributable to either operation are recorded in the respective accounts. The statement of financial position, statements of income, comprehensive income and cash flows of the insurance operations and shareholders operations which are presented as supplementary information have been provided to comply with requirements of the Insurance Regulations and is not required by International Financial Reporting Standards (IFRS). Moreover, the details relating to gross written premium and net written premium, surplus distribution, are also disclosed under notes 30, 31 and 32 of these financial statements to comply with the requirements of the Regulator.

2. Basis of preparation (continued)

a) Statement of Compliance (continued)

In preparing the Company's financial statements in compliance with IFRS as endorsed in KSA, the balances and transactions of the insurance operations are amalgamated and combined with those of the shareholders' operations. Inter-operation balances, transactions and unrealized gains and losses, if any, are eliminated in full during amalgamation. The accounting policies adopted for the insurance operations and shareholders' operations are uniform for like transactions and events in similar circumstances.

In accordance with the requirements of the Regulations issued by SAMA and as per by-laws of the Company, shareholders of the Company are to receive 90% of the annual surplus from insurance operations and the policyholders are to receive the remaining 10%. Any deficit arising from insurance operations is transferred to the shareholders' operations in full.

(b) Basis of measurement

The financial statements are prepared under the going concern basis and the historical cost convention, except as described in respective policies in Note 3.

(c) Basis of presentation

The Company's statement of financial position is not presented using a current/non-current classification and is presented in order of liquidity. However, the following balances would generally be classified as current: cash and cash equivalents, term deposits, financial assets at FVTPL, prepaid expenses and other assets, accrued income on statutory deposit, accrued expenses and other liabilities, provision for zakat and accrued income payable to Insurance Authority. The following balances would generally be classified as non-current:, financial assets at FVOCI, financial assets at amortised cost, property and equipment, right-of-use assets, intangible assets and statutory deposit. The balances which are of mixed in nature i.e. include both current and non-current portions include insurance contract liabilities, reinsurance contract assets, employee benefit obligations and lease liabilities.

(d) Functional and presentation currency

The financial statements are expressed in Saudi Arabian Riyals ("SR") which is the functional and presentation currency of the Company. All financial information presented in SR has been rounded to the nearest thousands, except where otherwise indicated.

(e) Seasonality of operations

There are no seasonal changes that may affect insurance operations of the Company.

(f) Changes in products and services

During the year ended 31 December 2025, there were no significant changes in products or services and their terms of the insurance contracts offered by the Company.

3. Material accounting policy information

The material accounting policies used in the preparation of these financial statements are consistently applied for all years presented.

3.1 New IFRS, International Financial Reporting and Interpretations Committee's interpretations (IFRIC) and amendments thereof, adopted by the Company

A number of new amendments became applicable for the current reporting period i.e. for reporting periods beginning on or after 1 January 2025 and the Company had to change its accounting policies as a result of adopting the following amendments:

Interpretation	Description	Effective date
Amendments to IAS 21 'Foreign currencies'- Lack of Exchangeability	An entity is impacted by the amendments when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. A currency is exchangeable when there is an ability to obtain the other currency (with a normal administrative delay), and the transaction would take place through a market or exchange mechanism that creates enforceable rights and obligations.	Annual periods beginning on or after 1 January 2025

The Company did not identify any impact as a result of these amendments.

3. Material accounting policy information (continued)

3.2 New standards, amendments and interpretations not yet applied by the Company

Certain new standards and interpretations issued but not yet effective up to the date of issuance of the Company's financial statements are listed below. The listing is of standards and interpretations issued, which the Company reasonably expects to be applicable at a future date. Management is in the process of assessing the impact of such new standards and interpretations on its financial statements. The Company intends to adopt these interpretations when they are effective.

Title	Description	Effective date
Amendment to IFRS 9 and IFRS 7 - Classification and measurement of financial instruments	These amendments: - clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system; - clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion; - add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environment, social and governance (ESG) targets); and - make updates to the disclosures for equity instruments designated at Fair Value through Other Comprehensive Income (FVOCI)	Annual periods beginning on or after 1 January 2026.
Annual improvements to IFRS – Volume 11	Annual improvements are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversights or conflicts between the requirements in the Accounting Standards. The 2024 amendments are to the following standards: • IFRS 1 First-time Adoption of International Financial Reporting Standards; • IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7; • IFRS 9 Financial Instruments; • IFRS 10 Consolidated Financial Statements; and • IAS 7 Statement of Cash Flows.	Annual periods beginning on or after 1 January 2026.
Amendment to IAS 21 - Translation to a Hyperinflationary Presentation Currency	These narrow-scope amendments specify the translation procedures for an entity whose presentation currency is that of a hyperinflationary economy. The entity applies the amendments if: • its functional currency is that of a non-hyperinflationary economy and it is translating its results and financial position into the currency of a hyperinflationary economy; or • it is translating into the currency of a hyperinflationary economy the results and financial position of a foreign operation whose functional currency is that of a non-hyperinflationary economy. The amendments aim to improve the usefulness of the resulting information in a cost-effective manner. Developed in response to stakeholder feedback, these amendments are expected to reduce diversity in practice and provide a clearer basis for reporting in a hyperinflationary currency.	Annual periods beginning on or after 1 January 2027.

3. Material accounting policy information (continued)

3.2 New standards, amendments and interpretations not yet applied by the Company (continued)

Title	Description	Effective date
IFRS 18 — Presentation and disclosure in financial statements	The new standard on presentation and disclosure in financial statements, require more focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS 18 relate to: - the structure of the statement of profit or loss; - required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and - enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.	Annual periods beginning on or after 1 January 2027.
IFRS 19 subsidiaries without Public accountability: disclosures	This new standard works alongside other IFRS Accounting Standards. An eligible subsidiary applies the requirements in other IFRS Accounting Standards except for the disclosure requirements and instead applies the reduced disclosure requirements in IFRS 19. IFRS 19's reduced disclosure requirements balance the information needs of the users of eligible subsidiaries' financial statements with cost savings for preparers. IFRS 19 is a voluntary standard for eligible subsidiaries. A subsidiary is eligible if: - it does not have public accountability; - it has ultimate or intermediate parent that produces consolidated financial statement available for public use that comply IFRS Accounting Standards.	Annual periods beginning on or after 1 January 2027.

Impact assessment

Several amendments apply for the first time in 2026 or after, but do not have a material impact, except for the application of IFRS 18, for which the management is assessing the impact on the financial statements of the Company.

3.3 Insurance and reinsurance contracts

i. Classification and summary of measurement models

The Company issues insurance contracts that transfer insurance risk. Insurance contracts are those contracts where the insurer accepts significant insurance risk from the policyholder by agreeing to compensate the policyholder if a specified uncertain future event adversely affects the policyholder. The Company uses judgement to assess whether a contract transfers insurance risk (that is, if there is a scenario with commercial substance in which the company has the possibility of a loss on a present value basis) and whether the accepted insurance risk is significant.

The Company issues non-life insurance to individuals and businesses. Non-life insurance products offered include medical, motor, liability, energy, engineering, general accident, fire and marine. These products offer protection of policyholder's assets and indemnification of other parties that have suffered damage as a result of a policyholder's accident. The Company does not issue any contracts with direct participating features.

In the normal course of business, the Company uses reinsurance to mitigate its risk exposures. A reinsurance contract transfers significant risk if it transfers substantially all of the insurance risk resulting from the insured portion of the underlying insurance contracts, even if it does not expose the reinsurer to the possibility of a significant loss.

None of the insurance contracts issued by the Company contain embedded derivatives, investment components or any other goods and services.

ii. Level of aggregation

The Company identifies portfolios of insurance contracts. Each portfolio comprises contracts that are subject to similar risks and managed together, and is divided into three groups:

- Any contracts that are onerous on initial recognition;
- Any contracts that, on initial recognition, have no significant possibility of becoming onerous subsequently; and
- Any remaining contracts in the portfolio.

3. Material accounting policy information (continued)

3.3 Insurance and reinsurance contracts (continued)

ii. Level of aggregation

The portfolios are further divided by year of issue.

Portfolios of reinsurance contracts held are assessed for aggregation separately from portfolios of insurance contracts issued. Applying the grouping requirements to reinsurance contracts held, the Company aggregates reinsurance contracts held concluded within a calendar year (annual cohorts) into groups of: (i) contracts for which there is a net gain at initial recognition, if any; (ii) contracts for which, at initial recognition, there is no significant possibility of a net gain arising subsequently; and (iii) remaining contracts in the portfolio, if any.

Reinsurance contracts held are assessed for aggregation requirements on an individual contract basis. The Company tracks internal management information reflecting historical experiences of such contracts' performance. This information is used for setting pricing of these contracts such that they result in reinsurance contracts held in a net cost position without a significant possibility of a net gain arising subsequently.

The Company assumes that no contracts are onerous at initial recognition, unless facts and circumstances indicate otherwise. If facts and circumstances indicate that some contracts are onerous, an additional assessment is performed to distinguish onerous contracts from non-onerous ones. For non-onerous contracts, the Company assesses the likelihood of changes in the applicable facts and circumstances in the subsequent periods in determining whether contracts have a significant possibility of becoming onerous. This assessment is performed at a policyholder-pricing-groups level.

iii. Recognition

The Company recognises a group of insurance contracts issued from the earliest of the following:

- The beginning of the coverage period of the group of contracts.
- The date when the first payment from a policyholder in the group becomes due. If there is no contractual due date, then it is considered to be the date when the first payment is received from the policyholder.
- For a group of onerous contracts, the date when facts and circumstances indicate that the group to which an insurance contract will belong is onerous.

The Company recognises a group of reinsurance contracts held it has entered into from the earlier of the following:

- For reinsurance contracts that provide proportionate coverage, at the later of:

  (i) the beginning of the coverage period of the group of reinsurance contracts and

  (ii) the initial recognition of any underlying contract.

- All other groups of reinsurance contracts held are recognised from the beginning of the coverage period of the group of reinsurance contracts;

However, if the Company entered into the reinsurance contract held at or before the date when an onerous group of underlying contracts is recognised prior to the beginning of the coverage period of the group of reinsurance contracts held, the reinsurance contract held, in this case, is recognised at the same time as the group of underlying insurance contracts is recognised.

Only contracts that individually meet the recognition criteria by the end of the reporting period are included in the groups. When contracts meet the recognition criteria in the groups after the reporting date, they are added to the groups in the reporting period in which they meet the recognition criteria, subject to the annual cohorts restriction. Composition of the groups is not reassessed in subsequent periods.

3. Material accounting policy information (continued)

3.3 Insurance and reinsurance contracts (continued)

iv. Contract boundaries

The measurement of a group of contracts includes all of the future cash flows within the boundary of each contract in the group. Cash flows are within the boundary of a contract if they arise from substantive rights and obligations that exist during the reporting period under which the Company can compel the policyholder to pay premiums or has a substantive obligation to provide services

The contract boundary is reassessed at each reporting date and, therefore, may change over time.

v. Measurement

The general measurement model (GMM), also known as the building block approach, consists of the fulfilment cash flows and the contractual service margin. This is the default model under IFRS 17 to measure insurance contracts. However, the Premium Allocation Approach (PAA), which is a simplified measurement model, is permitted if, and only if, at the inception of the group:

- The entity reasonably expects that such simplification would produce a measurement of the liability for remaining coverage for the group that would not differ materially from the one that would be produced applying the general measurement model requirements or
- The coverage period of each contract in the group (including insurance contract services arising from all premiums within the contract boundary determined at that date) is one year or less.

The Company uses the PAA to simplify the measurement of groups of contracts on the following bases:

- Insurance contracts:

The coverage period of medical, motor, energy, property, fire, marine and general accident contracts in the group of contracts is one year or less and are therefore eligible to be measured under the PAA.

PAA eligibility testing has been performed for the engineering and liability group of contracts. The Company reasonably expects that the measurement of the liability for remaining coverage for the group containing those contracts under the PAA would not differ materially from the measurement that would be produced applying the general measurement model. In assessing materiality, the Company has also considered qualitative factors such as the nature of the risk and types of its lines of business.

- Reinsurance contracts:

The Company reasonably expects that the resulting measurement under the PAA measurement model would not differ materially from the result of applying the general measurement model.

The Company does not apply the PAA if, at the inception of the group of contracts, it expects significant variability in the fulfilment cash flows that would affect the measurement of the liability for the remaining coverage during the year before a claim is incurred.

Measurement on initial recognition under PAA:

On initial recognition of each group of insurance contracts that are not onerous, the carrying amount of the liability for remaining coverage ("LRC") is measured at the premiums received on initial recognition less any insurance acquisition cash flows paid.

For reinsurance contracts held, on initial recognition, the Company measures the remaining coverage at the amount of ceding premiums paid.

On initial recognition of each group of insurance contracts, the Company assesses the time between providing each part of the coverage and the related premium due date. If the period is no more than a year i.e. no significant financing component exists, the Company does not adjust the carrying amount of the LRC and ARC to reflect the time value of money and the effect of financial risk using the discount rates.

3. Material accounting policy information (continued)

3.3 Insurance and reinsurance contracts (continued)

v. Measurement (continued)

Subsequent measurement under PAA:

The carrying amount of a group of insurance contracts issued at the end of each reporting period is the sum of:

a. the LRC; and
b. the LIC, comprising the fulfilment cash flows ("FCF") related to past service allocated to the group at the reporting date.

The carrying amount of a group of reinsurance contracts held at the end of each reporting period is the sum of:
a. the remaining coverage; and
b. the incurred claims, comprising the FCF related to past service allocated to the group at the reporting date

For insurance contracts issued, at each of the subsequent reporting dates, the LRC is:
a. increased for premiums received in the year, excluding amounts that relate to premium receivables included in the LIC;
b. decreased for insurance acquisition cash flows paid in the year
c. decreased for the amounts of expected premium receipts recognised as insurance revenue for the services provided in the year;
d. increased for the amortisation of insurance acquisition cash flows in the year recognised as insurance service expenses; and
e. increased for any adjustment to the financing component, where applicable.

For reinsurance contracts held, at each of the subsequent reporting dates, the remaining coverage is:
a. increased for ceding premiums paid in the year; and
b. decreased for the expected amounts of ceding premiums and broker fees recognised as reinsurance expenses for the services received in the year.

The Company estimates the liability for incurred claims as the fulfilment cash flows related to incurred claims. Fulfilment cash flows comprise estimates of future cash flows, an adjustment to reflect the time value of money and the financial risks related to future cash flows, to the extent that the financial risks are not included in the estimates of future cash flows, and a risk adjustment for non-financial risk.

The Company's objective in estimating future cash flows is to determine the expected value of a range of scenarios that reflects the full range of possible outcomes. The cash flows from each scenario are discounted and weighted by the estimated probability of that outcome to derive an expected present value. If there are significant interdependencies between cash flows that vary based on changes in market variables and other cash flows, then the Company uses stochastic modelling techniques to estimate the expected present value. Stochastic modelling involves projecting future cash flows under a large number of possible economic scenarios for market variables such as interest rates and equity returns. The determination of the discount rate that reflects the characteristics of the cash flows and liquidity characteristics of the insurance contracts requires significant judgement and estimation, which are covered in Note 4 (ii).

The fulfilment cash flows are adjusted for the time value of money and the effect of financial risk (using current estimates) if the liability for incurred claims is also adjusted for the time value of money and the effect of financial risk.

Some insurance contracts permit the Company to sell (usually damaged) assets acquired in settling a claim (for example, salvage). The Company may also have the right to pursue third parties for payment of some or all costs (for example, subrogation).

Estimates of salvage recoveries are included in the estimates of claims liability as it can reasonably be recovered from the disposal of the asset

3. Material accounting policy information (continued)

3.3 Insurance and reinsurance contracts (continued)

v. Measurement (continued)

Onerous contract assessment:

If at any time during the coverage period, facts and circumstances indicate that a group of contracts is onerous, then the Company recognises a loss in insurance service expense and increases the liability for remaining coverage to the extent that the current estimates of the fulfilment cash flows, determined under the GMM, that relate to remaining coverage (including the risk adjustment for non-financial risk) exceed the carrying amount of the liability for remaining coverage. A loss component will be established for the amount of the loss recognised. Subsequently, the loss component will be remeasured at each reporting date as the difference between the amounts of the fulfilments cash flows determined under the GMM relating to the future service and the carrying amount of the LRC without the loss component.

Where the Company recognises a loss on initial recognition of an onerous group of underlying insurance contracts or when further onerous underlying insurance contracts are added to a group, the Company establishes a loss-recovery component of the asset for remaining coverage for a group of reinsurance contracts held depicting the recovery of losses. The Company calculates the loss-recovery component by multiplying the loss recognised on the underlying insurance contracts and the percentage of claims on the underlying insurance contracts the Company expects to recover from the group of reinsurance contracts held. The loss-recovery component adjusts the carrying amount of the asset for remaining coverage.

When underlying insurance contracts are included in the same group with insurance contracts issued that are not reinsured, the Company applies a systematic and rational method of allocation to determine the portion of losses that relates to underlying insurance contracts.

Non-performance risk (NPR) adjustment:

The Company measures the estimates of the present value of future cash flows using assumptions that are consistent with those used to measure the estimates of the present value of future cash flows for the underlying insurance contracts, with an adjustment for any risk of non-performance by the reinsurer. The effect of the non-performance risk of the reinsurer is assessed at each reporting date and the effect of changes in the non-performance risk is recognised in profit or loss.

vi. De-recognition and contract modification

The Company derecognises a contract when it is extinguished i.e. when the specified obligations in the contract expire or are discharged or cancelled. The Company also derecognises a contract if its terms are modified in a way that would have changed the accounting for the contract significantly had the new terms always existed, in which case a new contract based on the modified terms is recognised. If a contract modification does not result in derecognition, then the Company treats the changes in cash flows caused by the modification as changes in the estimates of fulfilment cash flows. There were no instances of modification or derecognition identified for the year ended 31 December 2025.

vii. Acquisition & Attributable Cost

Insurance acquisition cash flows are the costs that directly associated with selling and handling acquired businesses. The company considers underwriting, sales, and regulatory levies as acquisition costs. Acquisition costs are not expensed when incurred and are deferred over the life of the insurance contract. While attributable costs are the costs that can fully or partially attributed to the insurance operations. The Company has in place allocation technique to allocate the costs based on direct to indirect costs ratio. Both acquisition and attributable costs fall under the insurance service expense while the non-attributable costs are reported under other operating expenses.

viii. Risk adjustments for non-financial risk

The Company has decided to adopt the Value at risk method on incurred claims for the estimation of risk adjustment. The Company has chosen a confidence level based on the 75th percentile of the distribution of the claim reserves, considering this level is adequate to cover sources of uncertainty about the amount and timing of the cash flows. While for premium risk, Solvency II approach is used to derive the risk with the same percentile as the claim reserves.

3. Material accounting policy information (continued)

3.3 Insurance and reinsurance contracts (continued)

ix. Presentation

Groups of insurance contracts that are assets and those that are liabilities, and groups of reinsurance contracts that are assets and those that are liabilities, are presented separately in the statement of financial position. The Company recognised in the statement of income (a) an insurance service result, comprising insurance revenue and insurance service expenses and net income / (expenses) from reinsurance contract, and (b) insurance finance income or expenses.

Insurance revenue:

The insurance revenue for each year is the amount of expected premium receipts for providing coverage in the period. The Company allocates the expected premium receipts to each period on the passage of time.

Insurance service expenses:

Insurance service expenses include the following:

a. incurred claims for the year.
b. other incurred directly attributable expenses.
c. insurance acquisition cash flows amortization.
d. changes that relate to past service – changes in the FCF relating to the LIC.
e. changes that relate to future service – changes in the FCF that result in onerous contract losses or reversals of those losses.

For contracts measured under the PAA, amortisation of insurance acquisition cash flows is based on the passage of time for all groups of contracts except for longer term policies under engineering and liability groups for which amortisation is done based on the expected timing of incurred insurance service expenses.

Net expenses from reinsurance contracts:

Net expenses from reinsurance contracts comprise reinsurance expenses less amounts recovered from reinsurers. The Company recognises reinsurance expenses as it receives coverage or other services under groups of reinsurance contracts. For contracts measured under the PAA, the Company recognises reinsurance expenses based on the passage of time over the coverage period of a group of contracts except for longer term policies under engineering and liability groups for which amortisation is done based on the expected timing of incurred insurance service expenses.

Income and expenses from reinsurance contracts are presented separately from income and expenses from insurance contracts. Income and expenses from reinsurance contracts, other than insurance finance income or expenses, are presented on a net basis as 'net expenses from reinsurance contracts' in the insurance service result.

Ceding commissions that are not contingent on claims of the underlying contracts issued reduce ceding premiums and are accounted for as part of reinsurance expenses. Ceding commissions that are contingent on claims of the underlying contracts issued reduce incurred claims recovery.

Insurance finance income and expenses:

Insurance finance income and expenses comprise changes in the carrying amounts of groups of insurance and reinsurance contracts arising from the effects of the time value of money, financial risk, and changes therein.

The Company includes all insurance finance income or expenses for the year in profit or loss.

Umrah and Hajj insurance pool:

The Company with twenty-seven other insurance companies operating in the Kingdom of Saudi Arabia, entered into an agreement with CCI effective from 1 January 2020. The compulsory Hajj / Umrah product is offered by the ministry and approved by IA for insurance of pilgrims coming from outside of the Kingdom of Saudi Arabia except for citizens of the Gulf Cooperation Council countries. This covers general accidents and health benefits of the pilgrims entering the Kingdom of Saudi Arabia to perform Hajj / Umrah. The agreement terms are for 4 years starting from 1 January 2020 and it is renewable for another four years subject to the terms and conditions of the agreement. There is no renewal to the agreement in 2024 as the aforementioned arrangement has been discontinued.

This co-insurance arrangement, in which the Company is a participant, is an insurance contract as defined in IFRS 17, and the Company has accordingly applied the recognition and measurement principles of IFRS 17. Given the bespoke nature of the arrangement and given that the rights and obligations from the arrangement are managed and settled on a net basis, the Company has accordingly presented the results from the arrangement on a net basis in insurance service results as a separate line item on the statement of comprehensive income and has provided more details in the notes.

3. Material accounting policy information (continued)

3.3 Insurance and reinsurance contracts (continued)

3.3.1 Classification, recognition and measurement

- ***Deferral of acquisition costs*** – Insurance acquisition cash flows are costs directly attributable to selling or underwriting a portfolio of insurance contracts. The Company has elected to capitalise and amortise these costs over the coverage period based on the passage of time for all groups of contracts except for longer term policies under engineering and liability groups for which amortisation is done based on the expected timing of incurred insurance service expenses.

- ***Discount rate*** – The liability for incurred claims is discounted at a rate that reflects the characteristics of the liabilities and the duration of each portfolio. The Company has established discount yield curves using risk-free rates adjusted to reflect the appropriate illiquidity characteristics of the applicable insurance contracts. Measurement of the liability for remaining coverage includes an adjustment for the time value of money and the effect of financial risk where the premium due date and the related period of services are more than 12 months apart.

- ***Risk Adjustment*** – The liability for incurred claims includes an explicit risk adjustment for non-financial risk ("risk adjustment") and risk adjustment is the compensation required for bearing the uncertainty that arises from non-financial risk.

- ***Onerous contracts*** – IFRS 17 requires the identification of groups of onerous contracts at a more granular level. For onerous contracts, the loss component based on projected profitability is recognized immediately in Net income.

3.3.2 Presentation and disclosure

Statement of financial position

Presentation is driven by portfolios which are composed of groups of contracts covering similar risks and which are managed together. Portfolios of insurance and reinsurance contracts are presented separately between:

- Portfolios of insurance and reinsurance contracts issued that are assets;
- Portfolios of insurance and reinsurance contracts issued that are liabilities;
- Portfolios of reinsurance contracts held that are assets; and
- Portfolios of reinsurance contracts held that are liabilities.

Statement of income

Insurance revenue includes gross earned premiums and estimates for expected premium receipts.

Insurance service expense includes gross incurred claims, changes in loss component, policy acquisition costs, attributable expenses and the impact of risk adjustment for non-financial risk.

Net income / (expenses) from reinsurance contracts held includes reinsurance premium ceded, changes in reinsurer's share of unearned premiums, reinsurance commission earned, reinsurance share of paid claims, reinsurance share of outstanding claims, reinsurance share of changes in claims incurred but not reported, change in reinsurance accrual reserve, expected credit losses on reinsurance receivables and the impact of loss adjustment the risk adjustment for non-financial risk.

Insurance service results are presented without the impact of discount unwinding and changes in discount rates which are shown separately under net insurance financial result.

Share of surplus from insurance pools (i.e. Umrah & Hajj scheme) is presented on a net basis within the total insurance service results after the insurance service result from the Company's directly written business.

Underwriting expenses, claims handling expenses, policy acquisition costs and general and administrative expenses are classified either as 'Incurred claims and other directly attributable expenses' within insurance service expense or as other operating expenses when they are not directly attributable to insurance contracts.

3. Material accounting policy information (continued)

3.4 Financial assets and liabilities

i. Initial recognition of financial assets

At initial recognition, the Company measures financial assets at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transactions costs that are directly attributable to the acquisition of financial asset. Transaction cost of financial assets carried at fair value through profit or loss are expensed in profit or loss. Immediately after initial recognition, an expected credit loss ("ECL") allowance is recognised for financial assets measured at amortised cost and investments measured at FVOCI.

When the fair value of financial assets and liabilities differs from the transaction price on initial recognition, the entity recognises the difference as follows:

a. When the fair value is evidenced by a quoted price in an active market for an identical asset or liability (that is, a Level 1 input) or based on a valuation technique that uses only data from observable markets, the difference is recognised as a gain or loss.
b. In all other cases, the difference is deferred and the timing of recognition of deferred day one profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

Amortised cost and effective interest rate

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortization using the effective profit method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, contributions or discounts and fees and points paid or received that are integral to the effective profit rate, such as origination fees.

Commission income is recognised using the effective profit rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired. For financial assets that have subsequently become credit impaired, profit income is recognised by applying the effective interest rate to the net carrying value of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, commission income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

ii. Classification and subsequent measurement of financial assets

The Company classifies its financial assets in the following measurement categories:

- Fair value through profit or loss (FVTPL);
- Fair value through other comprehensive income (FVOCI)
- Held at amortised cost.

The classification requirements for debt and equity instruments are described below:

Debt instruments

Classification and subsequent measurement of debt instruments depend on:

(i) the Company's business model for managing the financial assets; and
(ii) the contractual cash flow characteristics of the financial assets.

3. Material accounting policy information (continued)

3.4. Financial assets and liabilities (continued)

Business model:

The business model reflects how the Company manages the assets in order to generate cash flows. That is, whether the Company's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of 'other' business model and measured at FVTPL.

Factors considered by the Company in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated. For example, the liquidity portfolio of assets, which is held by the Company as part of liquidity management and is generally classified within the hold to collect and sell business model. Securities held for trading are held principally for the purpose of selling in the near term or are part of a portfolio of financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. These securities are classified in the 'other' business model and measured at FVTPL.

Solely payments of principal and profit:

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Company assesses whether the financial instruments' cash flows represent solely payments of principal and profit. In making this assessment, the Company considers whether the contractual cash flows are consistent with the financing agreement i.e. profit includes only consideration for the time value of resources, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

The Company exercises judgment in determining whether the contractual terms of financial assets it originates or acquires give rise on specific dates to cash flows that are solely payments of principal and profit income on the principal outstanding and so may qualify for amortised cost measurement. In making the assessment the Company considers all contractual terms, including any prepayment terms or provisions to extend the maturity of the assets, terms that change the amount and timing of cash flows and whether the contractual terms contain leverage. Based on these factors, the Company classifies its debt instruments into one of the following three measurement categories:

Amortised cost:

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and profit, and that are not designated at FVTPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised. Profit income from these financial assets is included in 'Commission income' using the effective profit method.

Fair value through other comprehensive income ("FVOCI"):

Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent solely payments of principal and profit, and that are not designated at FVTPL, are designated as FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, special commission income and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss. Profit income from these financial assets is included in 'Commission income' using the effective profit method. Currently no debt instrument is classified as FVOCI.

3. Material accounting policy information (continued)

3.4 Financial assets and liabilities (continued)

ii. Classification and subsequent measurement of financial assets (continued)

Fair value through profit or loss (FVTPL):

Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL presented in profit or loss in the year in which it arises. Currently investment in mutual funds and Sukuk which failed SPPI assessment are classified as FVTPL.

The Company reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are not expected to be frequent and no such instances have occurred during the year ended 31 December 2025.

Equity instruments:

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include basic ordinary shares.

The Company classifies all equity investments at FVTPL, except where the Company's management has elected, at initial recognition, to irrevocably designate an equity investment at FVOCI. The Company's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, transaction costs are made part of the cost at initial recognition and subsequent fair value gains and losses (unrealized) are recognized in OCI and are not subsequently reclassified to profit or loss, including on disposal. Impairment losses (and reversal of impairment losses) are not reported separately from other changes in fair value. The Company has designated its investment in Najm for Insurance Services Company, a Saudi Closed Joint Stock Company, as FVOCI.

Dividends, when representing a return on such investments, continue to be recognized in the statement of income as 'Dividend income' when the Company's right to receive payments is established. Currently all equity securities are designated as FVOCI.

Any gain or loss on the disposal of equity classified as FVOCI will be non- recycling i.e. on disposal, fair value movement residing in OCI will be moved directly from OCI to retained earnings.

iii. Impairment of financial assets

The Company assesses on a forward-looking basis the ECL associated with its financial assets. The impairment methodology applied depends on whether there has been a significant increase in credit risk. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Company applies the three-stage model for impairment of financial assets measured at amortised cost and FVOCI, based on changes in credit quality since initial recognition.

Stage 1 ("Performing") includes financial assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date. For these financial assets, 12-month expected credit losses ("ECL") are recognised and financial income is calculated on the gross carrying amount of the asset (that is, without deduction for credit allowance). A 12-month ECL is the ECL that results from default events that are possible within 12-months after the reporting date. It is not the expected cash shortfalls over the 12-month period but the entire credit loss on an asset, weighted by the probability that the loss will occur in the next 12-months.

3. Material accounting policy information (continued)

3.4 Financial assets and liabilities (continued)

iii. Impairment of financial assets (continued)

Stage 2 ("Under-performing") includes financial assets that have had a significant increase in credit risk since initial recognition, but do not have objective evidence of impairment. A significant increase in credit risk is presumed if a receivable is more than 30 days past due. For these financial assets, lifetime ECL are recognised, but financial income is still calculated on the gross carrying amount of the asset. Lifetime ECL is the ECL that results from all possible default events over the maximum contractual period during which the Company is exposed to credit risk. ECL is the weighted average credit losses, with the respective risks of a default occurring as the weights.

Stage 3 ("Non-performing") includes financial assets that have objective evidence of impairment at the reporting date. A default on a financial asset is when the counterparty fails to make contractual payments within 90 days of when they fall due. For these financial assets, lifetime ECL are recognised and financial income is calculated on the net carrying amount (that is, net of credit allowance).

The Company, when determining whether the credit risk on a financial asset has increased significantly, considers reasonable and supportable information available (e.g. days past due, customer credit scoring etc.), in order to compare the risk of a default occurring at the reporting date with the risk of a default occurring at initial recognition of the financial asset.

Financial assets are written-off only when there is no reasonable expectation of recovery.

Where financial assets are written-off, the Company continues to engage enforcement activities to attempt to recover the receivable due. Recoveries made, after write-off, are recognized in profit or loss.

Impairment losses on financial assets are presented separately on the statement of income.

iv. Derecognition of financial assets

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Company transfers substantially all the risks and rewards of ownership, or (ii) the Company neither transfers nor retains substantially all the risks and rewards of ownership and the Company has not retained control.

The Company enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in statement of income.

v. Classification and subsequent measurement of financial liabilities

All financial liabilities are recognised at the time when the Company becomes a party to the contractual provisions of the instrument. Financial liabilities are recognized initially at fair value less any directly attributable transaction cost. Subsequent to initial recognition, these are measured at amortized cost using the effective profit method.

vi. Derecognition of financial liabilities

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires). Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in respective carrying amounts is recognised in the statement of income.

3. Material accounting policy information (continued)

3.4 Financial assets and liabilities (continued)

3.4.1 Classification and measurement

To determine their classification and measurement category, IFRS 9 requires all financial assets to be assessed based on a combination of the Company's business model for managing the assets and the instruments' contractual cash flow characteristics. The following classification categories apply to financial assets under IFRS 9:

- Financial assets at fair value through profit or loss, including equity instruments and derivatives;
- Debt instruments at fair value through other comprehensive income, with gains or losses recycled to profit or loss on derecognition;
- Equity instruments at fair value through other comprehensive income, with no recycling of gains or losses to profit or loss on derecognition (not used by the Company); and
- Debt instruments at amortised cost.

All fair value changes of financial liabilities designated as at FVTPL will generally be presented as follows:

- The amount of the change in the fair value that is attributable to changes in the credit risk of the liability will be presented in Other Comprehensive Income (OCI);
- The remaining amount of the change in the fair value is presented in the statement of income.

3.4.2 Impairment calculation

The Expected Credit Loss ("ECL") allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss); unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss.

Lifetime expected credit losses represent ECL that would result from all possible default events over the expected life of the financial asset whereas 12 month expected credit losses are those life expected credit losses expected to occur within 12 months of statement of financial position date. Both lifetime ECLs and 12-month ECLs will be calculated on an individual basis depending on the nature of the underlying portfolio of financial instruments.

ECL is computed based on the parameters namely Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD) values. ECL is discounted to present value.

Probability of Default ('PD'): The probability of default is an estimate of the likelihood of default over a given time horizon.

Loss Given Default ('LGD'): Loss given default inputs are determined by class of financial instrument based on historical experience of loss and recovery rates for similar financial instruments and other relevant industry data.

Exposure at Default ('EAD'): The exposure at default is an estimate of the exposure at a future default date.

Forward looking estimate: While estimating the ECL, the Company will review macro-economic developments occurring in the economy and market it operates in. On a periodic basis, the Company will analyze the relationship between key economic trends with the estimate of PD.

Impairment applies to financial instruments that are not measured at fair value through profit or loss (FVTPL). Equity instruments measured at FVOCI are also excluded from the purview of impairment.

Financial assets that are subject to impairment consist of investment portfolio, time deposits and cash and cash equivalents.

3.5 Commission, dividend income and other income

Commission income on short-term deposits is recognised on a time proportion basis using the effective interest rate method and are disclosed under 'net investment income' in statement of income. Dividend income is recognised when the right to receive a dividend is established and is included under realised gain on FVTPL investments in the statement of income.

3. Material accounting policy information (continued)

3.6 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the year in which the dividends are approved by the Company's shareholders.

3.7 Cash and cash equivalents

Cash and cash equivalents include cash at banks and other short-term highly liquid investments, if any, with less than three months maturity from the date of acquisition.

3.8 Term deposits

Short-term deposits are placed with local banks and financial institutions with an original maturity of more than three months but less than or equal to twelve months from the date of placement.

Long-term deposit represents deposit with maturity of more than one year from the date of placement and is placed with a financial institution carrying commission income.

3.9 Operating segments

A segment is a distinguishable component of the Company that is engaged in providing products or services (an operating segment), which is subject to risk and rewards that are different from those of other segments. For management purposes, the Company is organized into business units based on their products and services and has the following major reportable segments:

- Medical provides compensation to policyholders for expenses incurred in treatment of a disease, illness or injury.
- Motor provides coverage against losses and liability related to motor vehicles.
- Energy provides coverage against risks associated with energy operations, business interruption, and liability arising from activities such as oil and gas exploration, production, and related infrastructure.
- Engineering provides coverage for risks related to construction and engineering projects, including damage to works, machinery breakdown, and third-party liability arising during the construction and operational phases.
- Other includes property, marine, energy, engineering, accident and liability.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chief Executive Officer that makes strategic decisions.

No inter-segment transactions occurred during the period. If any transaction were to occur, transfer prices between business segments are set on an arm's length basis in a manner similar to transactions with third parties. Segment revenue, expense and results will then include those transfers between business segments which will then be eliminated at the level of the financial statements of the Company.

3.10 Goodwill

Goodwill is initially measured at excess of the fair value of the consideration paid over the fair value of the identifiable assets and liabilities acquired. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Impairment for goodwill is determined by assessing the recoverable amount of the cash generating unit (or a group of cash generating units) to which the goodwill is related. When the recoverable amount of the cash-generating unit (or a group of cash generating units) is less than the carrying amount of the cash generating unit (or a group of cash generating units) to which goodwill has been allocated, impairment loss is recognized in the statement of income. Impairment losses relating to goodwill cannot be reversed in future periods.

3.11 Property and equipment

Property and equipment are stated at cost less accumulated depreciation and any impairment losses. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of income during the financial year in which they are incurred.

3. Material accounting policy information (continued)

3.11 Property and equipment (continued)

Land is not depreciated. The cost of other items of property and equipment is depreciated on the straight-line method to allocate the cost over estimated useful lives, as follows:

	Years
Furniture and fixtures	5
Computer & equipment	3
Motor vehicles	5

The assets' residual values and useful lives are reviewed at each reporting date and adjusted if appropriate. The carrying values of these assets are reviewed for impairment when event or changes in circumstances indicate that the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are included in the statement of income**.**

3.12 Capital work-in-progress

Assets in the course of construction or development are capitalised in the capital work-in-progress within property and equipment. The asset under construction or development is transferred to the appropriate category in property and equipment, once the asset is in a location and / or condition necessary for it to be capable of operating in the manner intended by management.

The cost of an item of capital work-in-progress comprises its purchase price, construction / development cost and any other costs directly attributable to the construction or acquisition of an item intended by management.

Capital work-in-progress is measured at cost less any recognised impairment. Capital work-in-progress is not depreciated. Depreciation only commences when the assets are capable of operating in the manner intended by management, at which point they are transferred to the appropriate asset category.

3.13 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets are not capitalized, and the related expenditure is reflected in the statement of income in the period in which the expenditure is incurred. Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. Further, capital work in progress is not amortized.

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

The amortization expense on intangible assets with finite lives is recognized in the statement of income in the expense category that is consistent with the function of the intangible assets. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of income when the asset is derecognized. Intangible assets with indefinite useful lives are tested for impairment annually at the cash generating unit ("CGU") level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

The estimated useful lives for the current year are as follows:

Software	5 years

Any impairment loss is recognised immediately in the statement of income.

The amortization method, useful life and residual value are reviewed at each reporting date and the changes are adjusted, if appropriate.

3. Material accounting policy information (continued)

3.14 Leases liabilities and right of use assets

Lease liabilities

The lease liability is initially measured at the net present value of the lease payments that are not paid at the commencement date. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Company, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the RoU asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Company:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received;
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the individual lessee, which does not have recent third-party financing, and
- makes adjustments specific to the lease, for example term, country, currency and security.

Lease liabilities include the net present value of the following lease payments:

- fixed lease payments, less any lease incentives receivable;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- amounts expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease liability is presented as a separate line in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest rate method) and by reducing the carrying amount to reflect the lease payments made.

The Company remeasures the lease liability (and makes a corresponding adjustment to the related RoU asset) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is re-measured by discounting the revised lease payments using a revised discount rate;
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is re-measured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due
- a lease contract is modified, and the lease modification is not accounted for as a separate lease, in which case the lease liability is re-measured by discounting the revised lease payments using a revised discount rate.

Right-of-use assets (RoU)

The RoU assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any.

Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37 "Provisions, contingent liabilities and contingent assets.

3.15 Provisions and other liabilities

Provisions are recognised when the Company has an obligation (legal or constructive) arising from past events, and the costs to settle the obligation are both probable and may be measured reliably. Provisions are not recognised for future operating losses. Liabilities are recognised for amounts to be paid in the future for goods or services received, whether billed by the supplier or not.

3. Material accounting policy information (continued)

3.16 Employees' benefit obligations

The Company operates a single post-employment benefit scheme of defined benefit plan driven by the labor laws and workman laws of the Kingdom of Saudi Arabia which is based on most recent salary and number of service years.

The post-employment benefits plan is not funded. Accordingly, valuations of the obligations under the plan are carried out by an independent actuary based on the projected unit credit method. The costs relating to such plans primarily consist of the present value of the benefits attributed on an equal basis to each year of service and the interest on this obligation in respect of employees' service in previous years.

Current and past service costs related to post-employment benefits are recognised immediately in the statement of income and while unwinding of the liability at discount rates used are recorded in the statement of income. Any changes in net liability due to actuarial valuations and changes in assumptions are taken as re-measurement in the statement of comprehensive income.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised directly in the statement of comprehensive income and transferred to retained earnings in the statement of changes in equity in the year in which they occur.

Changes in the present value of the defined benefit obligations resulting from plan amendments or curtailments are recognised immediately in statement of income as past service costs. End of service payments are based on employees' final salaries and allowances and their cumulative years of service, as stated in the labor law of Saudi Arabia.

3.17 Zakat

The Company is subject to zakat in accordance with the regulations of the Zakat, Tax, and Customs Authority ("ZATCA"). Zakat is calculated based on higher of approximate zakat base and adjusted profit and charged to profit or loss. Additional zakat, if any, is accounted for when determined to be required for payment.

Amounts accrued for zakat expense in one year may have to be adjusted in a subsequent year if the estimate of the annual charge changes.

On 22 March 2024, the Zakat, Tax and Customs Authority ("ZATCA") announced the issuance of a new Zakat Implementing Regulation, through the Ministerial Resolution (MR) No.1007 dated 29 February 2024, which was electronically published in the Official Gazette (Umm Al-Qura) on 21 March 2024. The new Zakat regulation is replacing the current regulation issued through MR No. 2216 dated 14 March 2019.

3.18 Impairment of non-financial assets

Assets that have an indefinite useful life – for example, land – are not subject to depreciation and are tested annually for impairment. Assets that are subject to depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows (cash-generating units).

3.19 Statutory reserve

In accordance with the Company's by-laws, the Company shall allocate 20% of its net income from shareholders operations each year to the statutory reserve until it has built up a reserve equal to the share capital. The reserve is not available for distribution.

3.20 Fair values

The fair value of financial assets is based on quoted prices for marketable securities or estimated fair values. The fair value of commission-bearing items is estimated based on discounted cash flow using commission for items with similar terms and risk characteristics.

3. Material accounting policy information (continued)

3.20 Fair values (continued)

For financial assets where there is no active market, fair value is determined by reference to the market value of a similar financial assets or where the fair values cannot be derived from active market, they are determined using a variety of valuation techniques. The inputs of this models are taken from observable market where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

4. Critical accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses, and the accompanying disclosures, and the disclosure of contingent liabilities. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

Following are the accounting judgments and estimates that are critical in preparation of these financial statements:

i. *Estimates of future cash flows to fulfil insurance contracts*

In estimating future cash flows, the Company incorporates, in an unbiased way, all reasonable and supportable information that is available without undue cost or effort at the reporting date. This information includes both internal and external historical data about claims and other experiences, updated to reflect current expectations of future events. The estimates of future cash flows reflect the Company's view of current conditions at the reporting date, as long as the estimates of any relevant market variables are consistent with observable market prices.

The estimates of these future cash flows are based on probability-weighted expected future cash flows. The Company estimates which cash flows are expected and the probability that they will occur as at the measurement date. In making these expectations, the Company uses information about past events, current conditions and forecasts of future conditions. The Company's estimate of future cash flows is the mean of a range of scenarios that reflect the full range of possible outcomes. Each scenario specifies the amount, timing and probability of cash flows. The probability-weighted average of the future cash flows is calculated using a deterministic scenario representing the probability-weighted mean of a range of scenarios.

When estimating future cash flows, the Company takes into account current expectations of future events that might affect those cash flows. However, expectations of future changes in legislation that would change or discharge a present obligation or create new obligations under existing contracts are not taken into account until the change in legislation is substantively enacted. Cash flows within the boundary of a contract relate directly to the fulfilment of the contract, including those for which the Company has discretion over the amount or timing. These include payments to (or on behalf of) policyholders, insurance acquisition cash flows and other costs that are incurred in fulfilling contracts.

Where estimates of expenses-related cash flows are determined at the portfolio level or higher, they are allocated to groups of contracts on a systematic basis. The Company has determined that this method results in a systematic and rational allocation. Similar methods are consistently applied to allocate expenses of a similar nature. Expenses of an administrative policy maintenance nature are allocated to groups of contracts based on the number of contracts in force within groups. The Company performs regular expense studies to determine the extent to which fixed and variable overheads are directly attributable to fulfil the insurance contracts.

Insurance acquisition cash flows arise from the activities of selling, underwriting and starting a group of contracts that are directly attributable to the portfolio of contracts to which the group belongs. Other costs that are incurred in fulfilling the contracts include claims handling, maintenance and administration costs, and recurring commissions payable on instalment premiums receivable within the contract boundary. Insurance acquisition cash flows and other costs that are incurred in fulfilling contracts comprise both direct costs and an allocation of fixed and variable overheads. Cash flows are attributed to acquisition activities, other fulfilment activities and other activities at local entity level using activity-based costing techniques. Cash flows attributable to acquisition and other fulfilment activities are allocated to groups of contracts using methods that are systematic and rational and are consistently applied to all costs that have similar characteristics. Other costs are recognised in profit or loss as they are incurred.

4. Critical accounting judgments, estimates and assumptions (continued)

ii. *Discounting methodology*

Discount rates are primarily used to adjust the estimates of future cash flows to reflect the time value of money and other financial risks to accrete interest on the liability for incurred claims.

The bottom-up approach was used to derive the discount rate. Under this approach, the USD based risk free discount rates were used as a starting point for preparing the yield curve given that SR is pegged with USD. The Company then further added a KSA country risk premium to make the yield curve appropriate for application. The Company has used the USD volatility adjustment for Solvency II as a proxy for illiquidity premium. The Company is currently discounting liability for incurred claims for all groups of insurance contracts.

The yield curves that were used to discount the estimates of future cash flows that do not vary based on the returns of the underlying items are as follows:

2025 **Insurance contracts issued and reinsurance contracts held**	**Currency**	**1 year**	**2 years**	**3 years**	**4 years**	**5 years**
Medical	SR	**4.67%**	**4.65%**	**4.91%**	**5.12%**	**5.32%**
Motor	SR	**4.67%**	**4.65%**	**4.91%**	**5.12%**	**5.32%**
Others	SR	**4.67%**	**4.65%**	**4.91%**	**5.12%**	**5.32%**
2024 Insurance contracts issued and reinsurance contracts held	Currency	1 year	2 years	3 years	4 years	5 years

Others	SR	5.17%	5.01%	5.05%	5.03%	5.00%

iii. *Risk adjustment for non-financial risks*

The Company shall adjust the estimate of the present value of the future cashflows to reflect the compensation that the entity requires for bearing the uncertainty about the amount and timing of the cashflows that arises from non-financial risk. So, the purpose of the risk adjustment for non-financial risk is to measure the effect of uncertainty in the cashflows that arise from insurance contracts, other than uncertainty arising from financial risk. The risks covered by the risk adjustment for non-financial risk are insurance risk and other non-financial risks such as lapse risk and expense risk.

The Company adopted the PAA simplification for the calculation of liability for remaining coverage. Therefore, risk adjustment for liability for remaining coverage will only be estimated in case a group of contracts is recognized as onerous.

Applying a confidence level technique, the Company estimates the probability distribution of the expected present value of the future cash flows from insurance contracts at each reporting date and calculates the risk adjustment for non-financial risk as the excess of the value at risk at the 75th percentile (the target confidence level) over the expected present value of the future cash flows.

iv. *Onerosity determination*

Under the PAA, the Company shall assume no contracts in the portfolio are onerous at initial recognition unless "facts and circumstances" indicate otherwise. The Company performs the assessment of onerous contracts on an annual and underwriting year basis, in conjunction with updated information on product profitability. Furthermore, the assessment shall be repeated if "facts and circumstances" indicate that there are significant changes in product pricing, product design, plans and forecasts. This level of granularity determines sets of contracts. The Company uses significant judgement to determine at what level of granularity the Company has reasonable and supportable information that is sufficient to conclude that all contracts within a set are sufficiently homogeneous and will be allocated to the same group without performing an individual contract assessment.

4. Critical accounting judgments, estimates and assumptions (continued)

iv. Onerosity determination (continued)

The Company has established a process for the underwriting team to capture onerous, potentially onerous and profitable contracts by assessing the profitability of the different portfolios at the start of the underwriting year. The profitability of each portfolio shall be assessed separately. Refer Note 3.3.1 for further details in this regard.

v. *Fair value of financial instruments*

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Company uses its judgement to select a variety of methods and to make assumptions that are mainly based on market conditions existing at the end of each reporting period. Refer to Note 27 for details relating to fair valuation techniques and a sensitivity analysis in relation to the significant assumptions.

vi. Estimates for expected premium receipts

The Company has developed a methodology for expected premium receipts based on provision matrix approach. Such balances have been reclassified to insurance contract liabilities in line with the requirements of IFRS 17. To measure the estimates, such balances have been grouped based on shared credit risk characteristics for respective policyholder base portfolio and the days past due. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors, affecting the ability of the customers to settle the receivables. The Company has identified the Gross domestic product of the country in which it operates to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors. An increase of 1% in the forward-looking GDP assumption, will result in a corresponding adjustment to the loss rates applied in the provision matrix, would result in a decrease of Saudi Riyals 0.6 million in insurance contract liabilities, with a corresponding increase in profit for the year. Conversely, a decrease of 1% in the forward-looking GDP assumption would result in an increase of Saudi Riyals 0.7 million in insurance contract liabilities, with a corresponding decrease in profit for the year.

vii. Presentation of the share of income from insurance pools

IFRS 17 does not have specific requirements on the presentation of assigning insurance income and expenses, and insurance assets and liabilities when an insurance contract is issued by more than one entity. Accordingly, the Company applied the requirements in IAS 8 in developing a policy for the presentation of the arrangement in which it is a co-insurer (refer to not 3.3 ix). The Company analysed the contractual terms of the arrangement policy and concluded that given the nature and substance of the arrangement, it is appropriate to present the results within net insurance results as a separate line item in the statement of income, with details provided in the notes. The Company believes this is appropriate as management has no ability to change the pricing or control the expenditure and as such do not think it is appropriate to include the results within revenue and expenses that are controllable by the Company. The current presentation of the arrangement is similar where an entity is acting as an agent, where the principle is as there is no control net presentation is more appropriate and disclosure is provided in the notes. Management believes the presentation and disclosure reflects the substance of the arrangement.

5. Cash and cash equivalents

Cash and cash equivalents comprise the following:

Policyholders' operations	**31 December 2025**	31 December 2024
Bank balances	**23,561**	72,075
Short term deposits	**-**	300
Less: Expected credit loss	**(16)**	(16)
	23,545	72,359
Shareholders' operations		
Bank balances	**198**	198
Short term deposits	**-**	473
	198	671
Total cash and cash equivalents	**23,743**	73,030

Cash and cash equivalents comprise cash at banks and short-term deposits with local banks with original maturities of three months or less from the date of placement. Cash at banks is placed with counterparties with sound credit ratings.

The gross carrying amount of cash and cash equivalents represents the Company's maximum exposure to credit risk on these financial assets which are categorised under investment grade and Stage 1. Investment grade includes those financial assets having credit exposure equivalent to Standard and Poor's rating of AAA to BBB. The Company's exposures to credit risk are not collateralized.

Movement in allowance for expected credit losses on cash and cash equivalents is as follows:

	31 December 2025	31 December 2024
Balance at beginning of the year	**16**	16
Balance at end of the year	**16**	16

6. Term deposits

Policyholders' operations	**31 December 2025**	31 December 2024
Term deposits	**-**	22,095
Accrued income	**-**	1,216
Balance at end of the year	**-**	23,311

Shareholders' operations	**31 December 2025**	31 December 2024
Term deposits	**-**	59,709
Accrued commission income	**-**	455
Balance at end of the year	**-**	60,164
	-	83,475

The term deposits represent deposits held with the local commercial banks and earn commission at market rates. These term deposits are denominated in Saudi Arabian Riyals and have an original maturity of more than three-months and less than twelve-months.

The gross carrying amount of term deposits represents the Company's maximum exposure to credit risk on these financial assets which are categorised under investment grade and Stage 1. Investment grade includes those financial assets having credit exposure equivalent to Standard and Poor's rating of AAA to BBB. The Company's exposures to credit risk are not collateralized.

7. Investments

Investments are classified as follows:

	Note	31 December 2025	31 December 2024
Financial assets at fair value through profit or loss ("FVTPL")	7.1	**250**	250
Financial assets at amortised cost	7.2	**126,598**	176,102
Financial assets at fair value through other comprehensive income ("FVOCI")	7.3	**72,722**	61,124
		199,570	237,476

7.1 Measured at fair value through profit or loss ("FVTPL")

FVTPL includes investments managed by a fund manager under the discretionary portfolio of investments where all such investments are carried at fair value as provided by the Fund managers. The fund manager keeps such investments in various equity and real estate funds, all of which are held for trading.

Movement in investment in discretionary portfolio is as follows:

	31 December 2025	31 December 2024
Balance at beginning of the year	**250**	246
Changes in fair value of investments	**-**	4
Balance at end of the year	**250**	250

7.2 Financial assets at amortised cost

Policyholders' operations	Note	31 December 2025	31 December 2024
Sukuk	7.2.1	**88,574**	88,850
Total amount		**88,574**	88,850

Shareholders' operations	Note	31 December 2025	31 December 2024
Sukuk	7.2.1	**38,024**	71,144
Other Sukuks		**-**	16,108
Total amount		**38,024**	87,252
		126,598	176,102

7.2.1 This represents the Company's investment in Saudi Government Sukuks. This represents diversified portfolio across various Sukuks instruments yielding an average return of 4.64% with various maturity durations.

The gross carrying amount of financial assets measured at amortised cost represents the Company's maximum exposure to credit risk on these financial assets which are categorised under investment grade and Stage 1. Investment grade includes those financial assets having credit exposure equivalent to Standard and Poor's rating of AAA to BBB, whereas non-investment grade represents un-rated exposures. The Company's exposures to credit risk are not collateralized.

7. Investments (continued)

7.3 Financial assets at fair value through other comprehensive income ("FVOCI")

	31 December 2025	31 December 2024
Balance at beginning of the year	**61,124**	43,463
Changes in fair value of investments	**11,598**	17,661
Balance at end of the year	**72,722**	61,124

This above represents the Company's 3.45% (31 December 2024: 3.45%) holding in Najm for Insurance Services Company, a Saudi Closed Joint Stock Company. These shares are un-quoted and are carried at fair value. Refer to note 27 for details relating to fair valuation techniques and a sensitivity analysis in relation to the significant assumptions.

8. Prepaid expenses and other assets

		31 December 2025	31 December 2024
Co-insurance income receivable		**-**	1,788
VAT receivables		**20,581**	5,701
Prepayments		**9,450**	7,935
Advances to staff		**1,315**	673
Other assets	**8.1**	**25,034**	13,376
		56,380	29,473

8.1 Other assets include an amount of SR 22 million paid by the Company to ZATCA in respect of zakat-related exposures arising from prior years, which is recoverable from UCA Bahrain, a related party (2024: nil). Based on regulatory correspondence and a legal opinion obtained, such balances are not transferable under the insurance portfolio transfer arrangement and remain the responsibility of UCA Bahrain. Management expects to recover the full amount and is monitoring the outcome of the related matter

9. Insurance and reinsurance contracts

9.1 Composition of the statement of financial position

An analysis of the amounts presented on the statement of financial position for insurance contracts and reinsurance contracts has been included in the table below:

31 December 2025	**Medical**	**Motor-Comprehensive**	**Motor-TPL**	**Energy**	**Engineering**	**Others**	**Total**
Insurance contracts							
Insurance contract assets	**14,283**	**26,130**	**139,983**	**16,642**	**30,394**	**23,465**	**250,897**
Insurance contract liabilities	**(81,428)**	**(23,736)**	**(395,887)**	**(15,690)**	**(67,008)**	**(14,693)**	**(598,442)**
	(67,145)	**2,394**	**(255,904)**	**952**	**(36,614)**	**8,772**	**(347,545)**

10. Right-of- use assets and lease liabilities

a) Amounts recognised in the statement of financial position

The statement of financial position shows the following amounts relating to leases:

Right-of-use assets – net

	31 December 2025	31 December 2024
1 January	**3,037**	4,161
Additions during the year	**-**	952
Depreciation during the year	**-**	(2,076)
De-recognise during the year	**(3,037)**	-
31 December	**-**	3,037

Right-of-use assets related to the lease of the Company's head office amounted to nil as at the reporting date (2024: SR 3 million). During the year, the lease agreement reached completion, and accordingly, the Company derecognized the related right-of-use assets and lease liabilities.

Lease liabilities

Commitments in relation to lease obligations are payable as follows:

	31 December 2025	31 December 2024
Within one year	**-**	1,417
Later than one year but not later than five years	**-**	18
	-	1,435
Future finance costs	**-**	(60)
Lease liabilities	**-**	1,375

Movement in lease liabilities is as follows:

	31 December 2025	31 December 2024
1 January	**1,375**	3,777
Addition during the year	**-**	952
Finance costs	**48**	114
Payment during the year	**(1,423)**	(3,468)
31 December	**-**	1,375

b) Amounts recognised in the statement of income

Total finance costs recognised in the statement of income pertaining to lease liabilities amounted to SR 48 thousand for the year ended 31 December 2025 (2024: SR 114 thousand).

c) Details for leasing activities of the Company

The Company leases office premises and various point-of-sale stores across the Kingdom of Saudi Arabia. Rental contracts are typically made for a period of 1 months to 3 years but may have extension options.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

The Company has an ongoing software development project for which it has incurred a cost of nil in current year (2024: SR 9.07 million) in terms of development cost.

13. Goodwill

Effective on 31 December 2008, the Company acquired the insurance operations of UCA Insurance Bahrain B.S.C. ('the seller') in the Kingdom of Saudi Arabia for a total consideration of SR 656.95 million with a goodwill of SR 78.4 million. The goodwill amount payable to the seller was paid in full subsequent to 2008, after obtaining SAMA approvals.

As at 31 December 2025, an independent impairment study was conducted in accordance with the requirements of the International Accounting Standard (IAS 36) to review the carrying amounts of goodwill recognised. For the impairment testing, assets are grouped into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Management considers the overall insurance portfolios of the Company as one CGU. The management reviews goodwill annually for impairment testing.

As at the reporting date, the recoverable amount has been determined using the fair value less costs of sell (FVLCS) approach, based on Level 1 market inputs, specifically the quoted share price and outstanding shares of the Company using market capitalisation approach. During 2024, impairment testing based on expected discounted cash flows was performed. Impairment test performed using value in use is based on the estimated future cash flows based on 5-year management's formal business plan projected up to the year 2029, discounted to their present value using the following key assumptions:

13. Goodwill (continued)

Key assumptions	**2025**	2024
EBITDA margin (average of next five years)	-	3%
Discount rate	-	17.8%
Terminal value growth rate	-	2%

The calculation of value-in-use is most sensitive to the assumptions on discount rate applied to cash flow projections and projected EBITDA margins.

Sensitivity to changes in key assumptions:

With regard to the assessment of the value-in-use, management believes that no reasonably possible change in any of the key assumptions above would cause the carrying value of the CGU including goodwill to materially exceed its recoverable amount. The implications of changes to the key assumptions are described below.

i) Projected EBITDA margin:

The projected EBITDA margin in the forecasted period has been estimated to be at an average of nil (2024:3%). If all other assumptions remain constant; a reduction of margin would give a value-in-use equal to the current carrying amount.

ii) Discount rate:

The projected discount rate in the forecasted period has been estimated to be at an average of nil (2024: 17.8%). If all other assumptions kept the same; an increase in discount rate would give a value-in-use equal to the current carrying amount.

Management performed an impairment assessment of goodwill as at 31 December 2025 in accordance with IAS 36 Impairment of assets by determining the recoverable amount of the relevant cash-generating unit (CGU). The recoverable amount was assessed using the fair value less costs of disposal (FVLCD) approach, based on Level 1 market inputs, specifically the quoted share price and outstanding shares of the Company.

Based on the above assessments, management concluded that no impairment of goodwill is required as at the reporting date.

14. Statutory deposit

	2025	2024
Statutory deposit	**60,000**	60,000
Less: Expected credit loss	**(11)**	(11)
Balance at the end of the year	**59,989**	59,989

In compliance with Article 58 of the Implementing Regulations of Insurance Authority (IA), the Company has deposited 15% of its share capital amounting to SR 60 million as of 31 December 2025 (31 December 2024: SR 60 million) in a bank designated by SAMA now IA. The Company cannot withdraw this deposit without IA approval. Commission accruing on this deposit is payable to IA. In accordance with instructions received from IA vide their circular dated 1 March 2016, the Company has disclosed the commission due on the statutory deposit as an asset and a liability in the annual financial statements.

Accrued income on this deposit is payable to Insurance Authority (IA) amounting to SR 0.85 million (31 December 2024: SR 1.64 million) and this deposit cannot be withdrawn without approval from IA. During the year, the Company has paid amounting SR 3.6 million to IA on 17th September 2025.

15. Accrued expenses and other liabilities

	2025	2024
VAT payables	**-**	14,909
Suppliers and other creditors	**20,623**	15,299
Withholding tax payable	**1,605**	1,722
Accrued expenses	**1,361**	1,947
Other liabilities	**7,530**	2,005
	31,119	35,882

16. Employees' benefit obligations

16.1 General description of the plan

The Company operates a defined benefit plan in line with the Labor Law requirement in the Kingdom of Saudi Arabia. The end-of-service benefit payments under the plan are based on the employees' final salaries and allowances and their cumulative years of service at the date of their termination of employment, as defined by the conditions stated in the Labor Laws of the Kingdom of Saudi Arabia. Employees' benefit obligations are unfunded plans and the benefit payment obligation are met when they fall due upon termination of employment.

16.2 Movement of defined benefit obligations is as follows:

	2025	2024
1 January	**11,484**	11,543
Current service cost	**2,025**	2,230
Finance costs	**531**	478
Payments	**(3,158)**	(2,214)
Remeasurement gain	**(887)**	(553)
31 December	**9,995**	11,484

16 Employees' benefit obligations (continued)

16.2 Movement of defined benefit obligations is as follows: (continued)

a. Amounts recognised in the statements of income and comprehensive income

The amounts recognised in the statements of income and comprehensive income related to employees' benefit obligations are as follows:

	31 December 2025	31 December 2024
Current service cost	**2,025**	2,230
Finance costs	**531**	478
Total amount recognised in the statement of income	**2,556**	2,708
Remeasurement gain on employees benefit obligations	**(887)**	(553)
Total amount recognised in the statement of comprehensive income	**1,669**	2,155

16.3 Principal actuarial assumptions

The following range of significant actuarial assumptions was used by the Company for the valuation of employees' defined benefit obligations:

	2025	2024
Discount rate	**4.45%**	5.25%
Salary growth rate	**3.95%**	4.75%

16.4 Sensitivity analysis for actuarial assumptions

The impact of changes in sensitivities on present value of defined benefit obligation is as follows:

	31 December 2025	31 December 2024
Discount rate		
- Increase by 1%	**(497)**	(612)
- Decrease by 1%	**563**	694
Salary growth rate		
- Increase by 1%	**560**	690
- Decrease by 1%	**(504)**	(620)

The sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of defined benefit obligation calculated with projected unit credit method at the end of the reporting period) has been applied when calculating the benefit obligations.

16.5 Expected maturity analysis

	Less than a year	**Between 1 - 2 years**	**Between 2 - 5 years**	**Over 5 years**	**Total**
31 December 2025	**2,682**	**1,106**	**2,368**	**7,043**	**13,199**
31 December 2024	2,747	1,172	3,143	4,422	11,484

17. Share capital

The authorized, issued and paid-up capital of the Company at 31 December 2025 is SR 400 million divided into 40 million shares of SR 10 each (31 December 2024: SR 400 million divided into 40 million shares of SR 10 each).

18. Insurance service results

An analysis of insurance revenue, insurance expenses and net income / (expenses) from reinsurance contracts held by portfolio of contracts for the years ended 31 December 2025 and 31 December 2024 is included in following tables respectively. Additional information on amounts recognized in statement of income is included in the insurance contract balances reconciliation.

For the year ended 31 December 2025:

	Medical	Motor-Comprehensive	Motor-TPL	Energy	Engineering	Others	Total
Insurance revenue from contracts measured under PAA	**31,535**	**102,763**	**495,900**	**10,298**	**195,172**	**22,645**	**858,313**

21. Share of surplus from insurance pools

	31 December 2025	31 December 2024
Share of surplus from Umrah and Hajj scheme (Note 21.1)	**36**	246

21.1 Share of surplus from Umrah and Hajj scheme

This represents the Company's share in the surplus for general accident product arising from the Umrah & Hajj scheme. The Company with twenty-seven other insurance companies operating in the Kingdom of Saudi Arabia, entered into an agreement with CCI effective from 1 January 2020. The compulsory Umrah product is offered by the ministry and approved by SAMA for insurance of pilgrims coming from outside of the Kingdom of Saudi Arabia except for citizens of the Gulf Cooperation Council countries. This covers general accidents and health benefits of the pilgrims entering the Kingdom of Saudi Arabia to perform Umrah. The agreement terms are for 4 years starting from 1 January 2020 and it is renewable for another four years subject to the terms and conditions of the agreement. There is no renewal to the agreement in 2024 as the aforementioned arrangement has been discontinued.

22. Other operating expenses

	31 December 2025	31 December 2024
Salaries and benefits	**11,185**	19,991
Legal and professional fee (22.1)	**6,395**	5,877
Depreciation and amortisation	**6,620**	4,013
Office supplies	**2,257**	3,190
Depreciation on right-of-use assets	**1,519**	1,038
Communication expenses	**653**	669
Training and education	**42**	46
Utilities	**77**	81
Finance cost on lease liability	**24**	57
Others	**15,177**	6,499
	43,949	41,461

22.1 Auditors' remuneration for the statutory audit and review of the Company's financial statements for the year ended 31 December 2025 amounts to SR 1.6 million (2024: SR 1.5 million). Fee for other statutory and related services provided by the auditors to the Company amounts to SR 0.7 million (2024: SR 0.2 million).

23. Zakat and income tax

Significant components of zakat base of the Company attributable to the Saudi shareholders, which are subject to adjustment under zakat and income tax regulations, are shareholders' equity at the end of the year and certain other items. Zakat base has been computed based on the zakat regulations enforced in the Kingdom of Saudi Arabia. The zakat regulations in Saudi Arabia are subject to different interpretations, and the assessments to be raised by the Zakat, Tax and Customs Authority ("ZATCA") could be different from the declaration filed by the Company.

The differences between the financial and the zakatable / taxable results are mainly due to certain adjustments in accordance with the relevant fiscal regulations.

Following are the components of the zakat base under the new regulations:

	31 December 2025	31 December 2024
Equity, at end of the year	**(50,475)**	284,114
Employee benefits obligations	**9,995**	10,918
Non-current liabilities	**339,345**	125,796
Adjustments to Zakat Adjusted Profit	**273**	1,049
Property and equipment and intangible assets, as adjusted	**(39,546)**	(122,038)
Investments	**(199,320)**	(237,226)
Statutory deposit	**(60,000)**	(59,989)
Zakat base	**272**	2,624
Attributable to Saudi Shareholders @ 100% (2024:100%)	**272**	2,624
Opening zakat provision for Saudi	**-**	-
Adjusted zakat base	**272**	2,624
Zakat @ 2.578%	**7**	68
Loss for the year	**(259,224)**	(11,055)
Fines and penalties	**152**	862
Other adjustments	**121**	187
End of services benefits	**2,556**	2,708
Adjusted loss for the year	**(256,395)**	(7,298)
Less provision paid	**(3,158)**	(2,214)
Depreciation differences	**12,186**	3,994
Taxable loss - Foreign partner's share	**(247,367)**	(5,518)
Zakat @ 2.5%	**-**	-
Income tax		
Attributable income to Non-Saudi Shareholder @ Nil (2024: Nil)	**-**	-
Income tax @ 20%	**-**	-
Zakat and income tax	**7**	68

23. Zakat and income tax (continued)

a. Movements in provision during the year

	Zakat payable	Income tax payable	Total 31 December 2025
Balance at beginning of the year	**12,629**	**1,300**	**13,929**
Reversal during the year	**(3,004)**	-	**(3,004)**
Payments during the year	**(9,109)**	-	**(9,109)**
Balance at end of the year	**516**	**1,300**	**1,816**

	Zakat payable	Income tax payable	Total 31 December 2024
Balance at beginning of the year	12,567	1,300	13,867
Provided during the year	4,000	-	4,000
Payments during the year	(3,938)	-	(3,938)
Balance at end of the year	12,629	1,300	13,929

Zakat is payable at 2.578% of the approximate zakat base (excluding adjusted net profit for the year) and 2.5% of adjusted net profit for the year attributable to Saudi shareholders.

b. Status of zakat assessments

The Zakat is applicable on 100% (2024: 100%) of the shareholders while income tax on nil (2024: nil) of the shareholders. The Company has filed its zakat and income tax declarations for the periods ended 31 December 2009 to 2023 and obtained restricted zakat and tax certificates. The following are the detailed outstanding assessments as of the date of the financial statements:

Assessment years 2009 – 2011

The Company has filed its Zakat/tax declarations for the years ended 31 December 2009 to 2011 and obtained the necessary Zakat/tax certificates. The ZATCA issued the amended assessment based on the decision of the Preliminary Objection Committee and claimed additional zakat and tax and withholding tax for a total of SR 27.1 million. Accordingly, the Zakat, tax and withholding tax status for the said years are considered finalized as per our zakat consultant.

Assessment years 2012 and 2013

The Company has filed its Zakat/tax returns for the years ended 31 December 2012 and 2013 and obtained the necessary Zakat/tax certificates.

ZATCA issued an assessment for the fiscal years 2012 and 2013, claiming additional Zakat, tax, and withholding tax liabilities amounting to SR 15.8 million. The Company actively pursued a final settlement with the Dispute Resolution Committee (DRC), which has accepted the Company's offer to settle the liability at SR 10.9 million. The Company is currently making payments in monthly installments over a one year period as per the agreed settlement terms.

23. Zakat and income tax (continued)

b. Status of zakat assessments (continued)

Assessment years 2014 to 2020

The Company has filed its Zakat/tax returns for the years ended 31 December 2014 to 2020 and obtained the necessary Zakat/tax certificates.

ZATCA finalized reviewing the zakat and tax returns for the said year's and they are considered finalized as per our zakat consultant

Assessment years 2021 and 2022

The Company has filed the Zakat and Tax returns up to the years 2021 and 2022 and obtained the necessary certificates.

The Zakat, Tax, and Customs Authority (ZATCA) has issued an assessment for the fiscal years 2021 and 2022 which shows a total credit balance of SR 0.39 million for both years resulting from the deduction of Governmental Sukuk.

The Company agreed with ZATCA, and the case is considered finalized as per our zakat consultant.

Assessment years 2023

The Company has filed its Zakat return for the years ended 31 December 2023 and obtained the necessary Zakat/tax certificates.

ZATCA is in the process of studying the Zakat return for the said year.

Assessment year 2024
The Company has filed its zakat return for the years ended 31 December 2024 and obtained the necessary zakat/tax certificates.

ZATCA is in the process of reviewing the Zakat return for the said year

VAT assessment

Assessment year 2018 and 2019
The fines imposed on the assessments amounting to SR 20.25 million for the years 2018 and 2019 were subsequently canceled as the Company has taken advantage of ZATCA's initiative to stabilize the economy and boost the private sector.

The Company has booked a provision against VAT on zero rated supplies. On other objected items, the Company is confident that these will be recovered through input claim in the VAT return and from reinsurer.

Assessment year 2020
On 25 August 2020, the Company received an assessment from ZATCA to pay additional principal VAT of SR 12.28 million for the years 2018 and 2019 as well as additional fines of SR 20.25 million for those years. In order to avoid incurring additional fines based on ZATCA's initiative the Company paid the principal VAT on 28 October 2020 without prejudice to its position and objected to the items issued for the evaluation. On 20 February 2021, the Company filed an appeal with the General Secretariat of Tax Committees (GSTC) against the decision of the ZATCA for which management is confident of a favorable outcome. The objected items are zero rated supplies, self-invoicing, and reinsurance commission.

Assessment year 2021 and 2022
ZATCA issued the final VAT assessments for both years, demanding payment of an additional VAT amount of SR 12.5M. UCA appealed against SR 11.5M out of this amount, pertaining to Reinsurance Commission Income earned from non-resident reinsurers and Output VAT on bad debts. The cases are currently at GSZTC Higher Court level.

Assessment year 2023
The tax periods falling under FY23 are still under audit by ZATCA, and the final assessments have yet to be issued.

24. Basic and diluted losses per share

Basic and diluted losses per share for the year ended 31 December 2025 and 2024 are calculated by dividing total loss for the year attributable to the shareholders by the weighted average number of outstanding shares during the year.

	31 December 2025	31 December 2024
Weighted average number of ordinary shares	**40,000**	40,000
Net loss for the year attributable to the shareholders	**(256,220)**	(15,055)
Basic and diluted losses per share	**(6.41)**	(0.38)

25. Related party transactions and balances

Related parties represent major shareholders, directors and key management personnel of the Company, and companies of which they are principal owners and any other entities controlled, jointly controlled or significantly influenced by them (affiliated entities). Pricing policies and terms of these transactions are approved by the Company's management and Board of Directors. The following are the details of the major related party transactions during the year and the related balances:

	Nature of transactions	Amount of transactions for the year ended	
		31 December 2025	31 December 2024
Major shareholders			
Haji Hussien Ali Reza	Premium written	**6,743**	9,794
	Payments received	**(10,740)**	(5,643)
	Claims paid	**(716)**	(1,391)
Saudi Bin Laden – Group	Premium written	**132,058**	297,928
	Payments received	**(265,547)**	(143,377)
	Claims paid	**(105)**	(428)
Construction Products Company	Premium written	**657**	1,503
	Payments received	**(50)**	(58)
	Claims paid	**-**	(319)
UCA Bahrain	Payment on behalf of related party	**22,048**	-

25.1 Related parties balances

	Balance receivable as at	
	31 December 2025	31 December 2024
Premium receivable		
Haji Hussein Ali Reza	**688**	5,401
Saudi Bin Laden – Group	**64,674**	198,268
Construction Products Company	**8,016**	7,409
	73,378	211,078
Other balances		
UCA Bahrain	**22,048**	-
United Commercial Agencies	**-**	4
	22,048	4

Key management personnel are persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly and comprise top management executives including the Chief Executive Officer and the Chief Financial Officer of the Company. The transactions with related parties are carried out at commercial terms and conditions. Compensation to key management personnel is based on employment terms and as per the by-laws of the Company.

The compensation of key management personnel during the year ended is as follows:

	31 December 2025	31 December 2024
Salaries and benefits	**6,444**	7,050
Employees' benefit obligations	**387**	492
	6,831	7,542
Remuneration to those charged with governance	**2,323**	1,786

26. Supplemental schedule of non-cash information

		31 December 2025	31 December 2024
Net changes in fair value of investment measured at FVOCI	7.3	**11,598**	17,661
Remeasurement gain on employees' benefit obligations	16	**887**	553

27. Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction takes place either:

- in the accessible principal market for the asset or liability, or
- in the absence of a principal market, in the most advantages accessible market for the asset or liability.

The fair values of on-balance sheet financial instruments are not significantly different from their carrying amounts included in these financial statements.

a) Determination of fair value and fair value hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments:

Level 1 - quoted prices in active markets for the same or identical instrument that an entity can access at the measurement date;

Level 2 - quoted prices in active markets for similar assets and liabilities or other valuation techniques for which all significant inputs are based on observable market data; and

Level 3 - valuation techniques for which any significant input is not based on observable market data. The Company ascertains the Level 3 fair values based on a valuation technique which is primarily derived by net assets value of the respective investee at the year end.

b) Carrying amounts and fair value

The following table shows the carrying amount and fair values of financial assets, including their levels in the fair value hierarchy for financial instruments measured at fair value. It does not include fair value information for financial asset and liabilities not measured at fair value if the carrying amount is a reasonable approximation to fair value, as these are either short-term in nature or carry interest rates which are based on prevalent market interest rates.

	31 December 2025			
	Level 1	**Level 2**	**Level 3**	**Total**
Financial assets measured at fair value through other comprehensive income (FVOCI)				
Equity	**-**	**-**	**72,722**	**72,722**
Financial assets at fair value through profit or loss ("FVTPL")				
Discretionary portfolio	**250**	**-**	**-**	**250**
Total investments	**250**	**-**	**72,722**	**72,972**

	31 December 2024			
	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value through other comprehensive income (FVOCI)				
Equity	-	-	61,124	61,124
Financial assets at fair value through profit or loss ("FVTPL")				
Discretionary portfolio	250	-	-	250
Total investments	250	-	61,124	61,374

27. Fair value of financial instruments (continued)

c) Carrying amounts and fair value (continued)

Specific valuation techniques used by management's independent experts to value financial instruments in Level 3 pertaining to investment in Najm, are as follows:

- **Discounted cashflows ("DCF") method:** The DCF valuation to discount the future operating cash flows of the Company to their present value using a weighted average cost of capital as the discount rate ("WACC"). The value derived from such an analysis result into a value for the enterprise (the "Enterprise Value"). This value includes the equity value of the company in addition to its net debt position. In order to arrive to an equity value of a company (the "Equity Value"), all outstanding financial debt and debt-like items, adjusted for excess cash and other liquid financial assets such as Murabahas and other investments, are subtracted from the Enterprise Value; and

- **Market multiples method:** The acquisition multiples of comparable private precedent transactions were assessed to indicate the value of the Company based on similar private transactions that have occurred during the previous period and covering full economic cycle. The Company has relied on local multiples valuation consisting of companies operating with a similar business model.

A weight of 60% and 40% are then applied to the fair values determined under both methods, to arrive at the equity valuation of Najm and the Company then accounts for its share in equity of Najm i.e. 3.45%.

Cash and cash equivalents, deposits, statutory deposits, accrued commission income on statutory deposits and the financial liabilities except employee benefit obligations are measured at amortized cost.

There were no transfers between levels 1 and 2 for recurring fair value measurements during the year. Additionally, there were no changes in the valuation techniques. Furthermore, there were no transfers into and out of level 3 measurements.

(c) Reconciliation of recurring fair value measurements categorized within Level 3 of the fair value hierarchy

	31 December 2025	31 December 2024
Balance at the beginning of the year	**61,124**	43,463
Fair value gain	**11,598**	17,661
Balance at the end of the year	**72,722**	61,124

27. Fair value of financial instruments (continued)

d) The below table shows significant unobservable inputs used in the valuation of level 3 investments and their respective sensitivities.

The below table shows significant unobservable inputs used in the valuation of level 3 investments.

	Fair value		**Unobservable inputs**		**Range of inputs**		**Relationship of Unobservable input to Fair value**
	31 December 2025	31 December 2024	**31 December 2025**	31 December 2024	**31 December 2025**	31 December 2024	
Unquoted equity investment in Najm	**72,722**	61,124	Revenue growth rate	Revenue growth rate	**8.74%**	9.9%	Reducing the revenue growth rate by 100 basis points, would decrease the fair value by SR 1.14 million. (2024: SR 0.61 million)
			WACC	WACC	**17.00%**	16.5%	Increasing the WACC by 100 basis points, would decrease the fair value by SR 1.86 million. (2024: SR 1.71 million)
			Terminal value growth rate	Terminal value growth rate	**1.5%**	1.5%	Reducing the terminal value growth rate to 0.5%, would decrease the fair value by SR 1.06 million. (2024: SR 1.10 million)
			EV/EBITDA multiple	EV/EBITDA multiple	**7**	7	Reducing the EV/EBITDA multiple to 6.0, would decrease the fair value by SR 2.76 million (2024: Reducing the EV/EBITDA multiple to 6.3, would decrease the fair value by SR 1.44 million).

There were no significant inter-relationships between unobservable inputs that materially affect fair values.

27. Fair value of financial instruments (continued)

e) Valuation process

The finance department of the Company performs the valuations of level 3 fair values required for financial reporting purposes. This team reports directly to the Chief Financial Officer (CFO), Investment Committee and the Audit Committee. Discussions of valuation processes and results are held between the CFO, AC, Investment Committee and the Finance team regularly. The main level 3 inputs used by the Company are derived and evaluated as follows:

- The discount rates are determined using a capital asset pricing model to calculate a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the asset.
- The terminal value growth rate is derived from publicly available databases.
- Earnings growth factors for unlisted equity securities are estimated based on such Company's own historical results.
- Revenue growth rate is estimated based on Company's own historical results and future projections.
- EV/EBITDA multiple is based on private precedent transactions.

28. Risk management

Risk governance

The Company's risk governance is manifested in a set of established policies, procedures and controls which uses the existing organizational structure to meet strategic targets. The Company's philosophy revolves on willing and knowledgeable risk acceptance commensurate with the risk appetite and strategic plan approved by the Board of Directors of the Company. The Company is exposed to insurance, reinsurance, regulatory framework, credit, liquidity, foreign currency, commission rate, and market risk.

Risk management structure:
A cohesive organizational structure is established within the Company in order to identify, assess, monitor, and control risks.

Board of directors:
The apex of risk governance is the centralized oversight of Board of Directors providing direction and the necessary approvals of strategies and policies in order to achieve defined corporate goals.

Audit committee and internal audit department:
The internal audit department performs risk assessments with senior management annually. The internal audit department examines both adequacy of procedures and the Company's compliance with the procedures through regular audits. Audit findings and recommendations are reported directly to the Audit Committee.

Senior management:
Senior management is responsible for the day to day operations towards achieving the strategic goals within the Company's pre-defined risk appetite.

Risk management committee:
The Board of Directors of the Company has constituted a Risk Management Committee, which oversees the risk management function of the Company and report to Board on a periodic basis. This committee operates under framework established by the Board of Directors.

The primary objective of the Company's risk and financial management framework is to protect the Company from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities.

The risks faced by the Company and the manner in which these risks are mitigated by management are summarized below:

28. Risk management (continued)

28.1 Insurance risk

The principal risk the Company faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. For longer tail claims that take some years to settle, there is also inflation risk. Therefore, the objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, structured claims management, quarterly review of reserves as well as the use of reinsurance arrangements.

Further, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are established to reduce the risk exposure of the Company. The Company further enforces a policy of actively managing and promptly settling claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business. Inflation risk is mitigated by taking expected inflation into account when estimating insurance contract liabilities and pricing appropriately.

The Company purchases reinsurance as part of its risk's mitigation program. Reinsurance ceded is placed on both a proportional and non-proportional basis. The majority of proportional reinsurance is quota-share reinsurance which is taken out to reduce the overall exposure of the Company to certain classes of business. Non-proportional reinsurance is primarily excess-of-loss reinsurance designed to mitigate the Company's net exposure to catastrophe losses. Retention limits for the excess-of-loss reinsurance vary by product line and territory.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to reinsurance ceded, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance arrangements. The Company's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Company substantially dependent upon any single reinsurance contract.

(a) Frequency and severity of claims

The frequency and severity of claims can be affected by several factors like natural disasters, flood, environmental and economical, atmospheric disturbances, concentration of risks, civil riots etc. The Company manages this risk through the measures described above. The company has limited its risk by imposing maximum claim amounts on certain contracts as well as the use of reinsurance arrangements in order to limit exposure to catastrophic events (e.g., hurricanes, earthquakes and flood damage). The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes based on the Company's risk appetite as decided by management. The Board of Directors may decide to increase or decrease the maximum tolerances based on market conditions and other factors. The Company monitors concentration of insurance risks primarily by class of business.

(b) **Concentration of insurance risk**

The Company monitors concentration of insurance risks primarily by class of business. The major concentration lies in medical and motor segments.

The Company also monitors concentration of risk by evaluating multiple risks covered in the same geographical location. For flood or earthquake risk, a complete city is classified as a single location. For fire and property risk a particular building and neighbouring buildings, which could be affected by a single claim incident, are considered as a single location. Similarly, for marine risk, multiple risks covered in a single vessel voyage are considered as a single risk while assessing concentration of risk. The Company evaluates the concentration of exposures to individual and cumulative insurance risks and establishes its reinsurance policy to reduce such exposures to levels acceptable to the Company.

Since the Company operates primarily in Saudi Arabia, hence, all the insurance risks relate to policies written in Saudi Arabia.

28. Risk management (continued)

28.1 Insurance risk (continued)

(c) Reinsurance Risk

In order to minimize financial exposure arising from large claims, the Company, in the normal course of business, enters into agreements with other parties for reinsurance purposes.

To minimize its exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsurers.

Reinsurers are selected using the following parameters and guidelines set by the Company's Board of Directors. The criteria may be summarized as follows:

- Minimum acceptable credit rating by recognized rating agencies (e.g. S&P) that is not lower than BBB or equivalent;
- Reputation of particular reinsurance companies; and
- Existing or past business relationship with the reinsurer.

Furthermore, the financial strength and managerial and technical expertise as well as historical performance of the reinsurers, wherever applicable, are thoroughly reviewed by the Company and agreed to pre-set requirements of the Company's Board of Directors and Reinsurance Committee before approving them for reinsurance business. As at 31 December 2025 and 31 December 2024 there is no significant concentration of reinsurance balances.

Reinsurance ceded contracts do not relieve the Company from its obligations to policyholders and as a result the Company remains liable for the portion of insurance contract liabilities reinsured to the extent that the reinsurer fails to meet the obligations under the reinsurance agreements.

There is no single counterparty exposure that exceeds 10% of total reinsurance assets at the reporting date.

The nature of the Company's exposure to insurance risks and its objectives, policies and processes used to manage and measure the risks have not changed from the previous year.

The following tables show the concentration of net insurance contract liabilities by type of contract:

	31 December 2025			31 December 2024		
	Insurance contracts issued	**Reinsurance contracts held**	**Net**	Insurance contracts issued	Reinsurance contracts held	Net
Medical	**67,145**	**(3,611)**	**63,534**	77,615	(608)	77,007
Motor-Comprehensive	**(2,394)**	**5,084**	**2,690**	(45,925)	9,447	(36,478)
Motor-TPL	**255,904**	**5,132**	**261,036**	219,077	17,540	236,617
Energy	**(952)**	**(4)**	**(956)**	7,748	(7,786)	(38)
Engineering	**36,614**	**36,865**	**73,479**	(18,341)	22,893	4,552
Others	**(8,772)**	**(892)**	**(9,664)**	17,363	(21,489)	(4,126)
Total	**347,545**	**42,574**	**390,119**	257,537	19,997	277,534

(d) Sensitivities on major assumptions considered while applying IFRS 17

The following sensitivity analysis shows the impact on gross and net liabilities, profit / loss before zakat and equity for reasonably possible movements in key assumptions with all other assumptions held constant. The correlation of assumptions will have a significant effect in determining the ultimate impacts, but to demonstrate the impact due to changes in each assumption, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear. The method used for deriving sensitivity information and significant assumptions did not change from the previous year. The impact of sensitivities to changes in discount rates is minimal therefore not presented.

The Company believes that the claim liabilities under insurance contracts outstanding at the reporting periods below are adequate. However, these amounts are not certain and actual payments may differ from the claim's liabilities provided in the financial statements. The insurance results are sensitive to various assumptions. It has not been possible to quantify the sensitivity specific variables such as legislative changes or uncertainties in the estimation process.

28. Risk management (continued)

28.1 Insurance risk (continued)

(d) Sensitivities on major assumptions considered while applying IFRS 17 (continued)

	31 December 2025	31 December 2024
Impact on equity and net income of change in claims ratio		
5% Increase	**(3,878)**	(2,641)
5% Decrease	**2,583**	1,980
Impact on equity and net income of change in direct expense ratio – loss component		
2% Increase	**(494)**	(602)
2% Decrease	**494**	602
Impact on equity and net income of change in risk adjustment for non-financial risk		
5% Increase	**(187)**	(264)
5% Decrease	**187**	264

Following are the sensitivities derived for the portfolios computed under PAA approach after risk mitigation by reinsurance contracts held:

	31 December 2025	31 December 2024
Impact on equity and net income of change in claims ratio		
5% Increase	**(1,287)**	(1,048)
5% Decrease	**897**	786
Impact on equity and net income of change in direct expense ratio – loss component		
2% Increase	**(121)**	(129)
2% Decrease	**121**	129
Impact on equity and net income of change in risk adjustment for non-financial risk		
5% Increase	**(48)**	(21)
5% Decrease	**48**	21

(e) Claims development table

The following tables show the estimates of cumulative incurred claims, including both claims notified and IBNR for each successive accident year at each reporting date, together with cumulative payments to date. As required by IFRS 17, in setting claims provisions, the Company gives consideration to the probability and magnitude of future experience being more adverse than assumed which is reflected in the risk adjustment. In general, the uncertainty associated with the ultimate cost of settling claims is greatest when the claim is at an early stage of development. As claims develop, the ultimate cost of claims becomes more certain.

The Company aims to maintain adequate reserves in respect of its insurance business in order to protect against adverse future claims experience and developments. Claims triangulation analysis is by accident years, spanning a number of financial years.

28. Risk management (continued)

28.1 Insurance risk (continued)

(e) Claims development table (continued)

2025 Accident year	2021 & earlier	2022	2023	2024	2025	Total

28. Risk management (continued)

28.1 Insurance risk (continued)

(e) Claims development table (continued)

The reconciliation of the net liabilities for incurred claims with the aggregate carrying amounts of the groups of insurance contracts and reinsurance contracts is presented below:

	Estimates of present value of FCF	Risk adjustment for non-financial risk	Total
Gross liabilities for incurred claims	202,403	5,275	207,678
Amounts recoverable from reinsurers	(40,048)	(2,574)	(42,622)
Net liabilities for incurred claims	162,355	2,701	165,056

28.2 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign exchange rates (currency risk), market commission rates (commission rate risk) and market prices (price risk).

- The Company's market risk policy sets out the assessment and determination of what constitutes market risk for the Company. Compliance with the policy is monitored and exposures and breaches are reported to the Company risk committee. The policy is reviewed regularly for pertinence and for changes in the risk environment.

- Guidelines are set for asset allocation and portfolio limit structure, to ensure that assets back specific policyholders' liabilities and that assets are held to deliver income and gains for policyholders which are in line with their expectations.

- The Company stipulates diversification benchmarks by type of instrument and geographical area.

The Board of Directors of the Company ensure that the overall market risk exposure is maintained at prudent levels and is consistent with the available capital. While the Board of Directors gives a strategic direction and goals, risk management function related to market risk is mainly the responsibility of Investment Committee team. The team prepares forecasts showing the effects of various possible changes in market conditions related to risk exposures. This risk is being mitigated through the proper selection of securities. Company maintains diversified portfolio and performs regular monitoring of developments in related markets. In addition, the key factors that affect stock and sukuk market movements are monitored, including analysis of the operational and financial performance of investees.

Market risk comprises of three types of risk: currency risk, commission rate risk and other price risk.

a) Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Management assesses that there is minimal risk of significant losses due to exchange rate fluctuations and, consequently, the Company does not hedge its foreign currency exposure. The Company has transactions in SR and US Dollars which are pegged and hence there is no currency risk exposure to the Company.

b) Commission rate risk

Commission rate risk is the risk that the value of future cash flows of a financial instrument will change because of change in market commission rates.

The Company invests in securities and has deposits that are subject to commission rate risk. Commission rate risk to the Company is the risk of changes in commission rates reducing the overall return on its fixed commission rate bearing securities. The Commission rate risk is limited by monitoring changes in commission rates and by investing in floating rate instruments.

28. Risk management (continued)

28.2 Market risk (continued)

Floating rate instruments expose the Company to cash flow interest risk, whereas fixed interest rate instruments expose the Company to fair value commission rate risk.

There is no direct contractual relationship between financial assets and insurance and reinsurance contracts. However, the Company's interest rate risk policy requires it to manage the extent of net commission rate risk by maintaining an appropriate mix of fixed and variable rate instruments to support the insurance contract liabilities. The Company has no significant concentration of interest rate risk.

The Company is exposed to commission rate risk through its debt instruments held, deposits and in respect of liabilities or assets for incurred claims where cash flows are not expected to be settled within a year from when claims are incurred.

The Company's exposure to commission rate risk sensitive insurance and reinsurance contracts, deposits and debt instruments are, as follows:

	2025	2024
Insurance contract assets, net	**250,897**	229,836
Insurance contract liabilities, net	**598,442**	487,373
Reinsurance contract assets, net	**79,369**	80,608
Reinsurance contract liabilities, net	**121,943**	100,605
Debt instruments at amortized cost	**126,598**	259,577

The following analysis is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit / (loss) before zakat and impact on equity. The correlation of variables will have a significant effect in determining the ultimate impact of commission rate risk, but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear. The method used for deriving sensitivity information and significant variables has not changed from the previous year.

		2025		2024	
	Changes in commission rate	**Impact on profit before zakat**	**Impact on equity**	Impact on profit before zakat	Impact on equity
Insurance contract assets, net	**+/-2%**	**5,018**	**5,018**	4,597	4,597
Insurance contract liabilities, net	**+/-2%**	**(11,969)**	**(11,969)**	(9,747)	(9,747)
Reinsurance contract assets, net	**+/-2%**	**1,587**	**1,587**	1,612	1,612
Reinsurance contract liabilities, net	**+/-2%**	**(2,439)**	**(2,439)**	(2,012)	(2,012)
Debt instruments at amortized cost	**+/-2%**	**(2,532)**	**(2,532)**	5,191	5,191

The commission and non-commission bearing investments of the Company and their maturities as at 31 December 2025 and 31 December 2024 are as follows:

	Less than 1 year	**More than 1 year**	**Non-commission bearing**	**Total**
31 December 2025	**-**	**126,598**	**72,722**	**199,320**
31 December 2024	83,475	176,102	61,124	320,701

An increase or decrease of 100 basis points in interest yields would result in an increase / (decrease) in the profit or loss for the year of SR 1.5 million (31 December 2024: SR 2.6 million).

28. Risk management (continued)

28.2 Market risk (continued)

c) Other price risk

Other price risk is the risk that the fair value or future cash flows of financial instruments or insurance contract assets and / or liabilities will fluctuate because of changes in market prices (other than those arising from commission rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or contract, or by factors affecting all similar financial instruments traded in the market.

The Company's price risk exposure relates to financial assets and financial liabilities whose values will fluctuate as a result of changes in market prices. The Company does not issue any participating contracts. Therefore, there are no insurance or reinsurance contracts which are exposed to price risk. The Company's investments amounting to SR 84.8 million (31 December 2022: SR 60.5 million) are susceptible to market price risk arising from uncertainty about the future value of invested securities. The Company limits this nature of market risk by diversifying its invested portfolio and by actively monitoring the developments in markets.

The impact of a hypothetical change of a 10% increase and 10% decrease in the market prices of investments on comprehensive income would be as follows:

	Fair value change	Effect on Company's profit
31 December 2025	**+ / - 10%**	+ / - **7,272**
31 December 2024	+ / - 10%	+ / - 6,112

The sensitivity analysis presented is based upon the portfolio position as at 31 December 2025 and 2024. Accordingly, the sensitivity analysis prepared is not necessarily indicative of the effect on the Company's assets of future movements in the value of investments held by the Company. The method used for deriving sensitivity information and significant variables has not changed from the previous year.

28.3 Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. For all classes of financial instruments held by the Company, the maximum credit risk exposure to the Company is the carrying value as disclosed in the statement of financial position.

The following policies and procedures are in place to mitigate the Company's exposure to credit risk:

The Company only enters into insurance and reinsurance contracts with recognised, credit worthy third parties. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivables from insurance and reinsurance contracts are monitored on an ongoing basis in order to reduce the Company's exposure to bad debts.

The Company seeks to limit credit risk with respect to agents and brokers by setting credit limits for individual agents and brokers and monitoring outstanding receivables.

The Company's investment portfolio is managed by the investment committee in accordance with the investment policy established by the investment committee, which is approved by the Board of Directors.

The Company's other financial assets are held with commercial banks and financial institutions with strong financial positions and credit ratings. The Company's policy is to invest in high-quality, liquid (that is, investment-grade) financial instruments. The Company maintains its bank balances, short-term, long term and statutory deposits with banks which have investment grade credit ratings. Investments are made in instruments with either investment grade or satisfactory non-investment grade credit rating.

28. Risk management (continued)

28.3 Credit risk (continued)

The table below shows the maximum exposure to credit risk for the components of the statement of financial position:

	31 December 2025	31 December 2024
Cash and cash equivalents	**23,743**	73,030
Term deposits	**-**	83,475
Insurance contract assets	**250,897**	229,836
Reinsurance contract assets	**79,369**	80,608
Investments	**199,570**	237,476
Statutory deposit	**59,989**	59,989
Accrued income on statutory deposit	**850**	1,641
Staff and other receivables	**23,363**	14,049
	637,781	780,104

The table below provides information regarding the credit risk exposure of the Company by classifying assets according to the management's best estimate. Investment grade is considered to be the highest possible rating. Assets falling outside the range of investment grade are classified as non-investment grade satisfactory or past due but not impaired.

		Non-investment grade			
31 December 2025	**Investment grade**	**Satisfactory**	**Past due but not impaired**	**Past due and impaired**	**Total**
Cash and cash equivalents	**23,743**	**-**	**-**	**-**	**23,743**

Insurance contract assets	**-**	**250,897**	**-**	**-**	**250,897**
Reinsurance contract assets	**-**	**79,369**	**-**	**-**	**79,369**
Statutory deposit	**59,989**	**-**	**-**	**-**	**59,989**
Accrued commission income on statutory deposit	**850**	**-**	**-**	**-**	**850**
Staff receivables	**-**	**23,363**	**-**	**-**	**23,363**
31 December 2025	**284,152**	**353,629**	**-**	**-**	**637,781**

		Non -investment grade			
31 December 2024	Investment grade	Satisfactory	Past due but not impaired	Past due and impaired	Total
Cash and cash equivalents	73,030	-	-	-	73,030
Term deposits	83,475	-	-	-	83,475
Investments	237,476	-	-	-	237,476
Insurance contract assets	-	229,836	-	-	229,836
Reinsurance contract assets	-	80,608	-	-	80,608
Statutory deposit	59,989	-	-	-	59,989
Accrued commission income on statutory deposit	1,641	-	-	-	1,641
Staff receivables	-	14,049	-	-	14,049
31 December 2024	455,611	324,493	-	-	780,104

28. Risk management (continued)

28.3 Credit risk (continued)

Concentration of credit risk

Concentration of credit risk exists when changes in economic or industry factors similarly affect groups of counterparties whose aggregate credit exposure is significant in relation to the Company's total credit exposure. All of the Company's underwriting activities are carried out in Saudi Arabia. The Company's portfolio of financial instruments is broadly diversified, and transactions are entered into with diverse credit-worthy counterparties thereby mitigating any significant concentrations of credit risk.

28.4 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet obligations and commitments associated with financial liabilities. The Company has a proper cash management system, where daily cash collections and payments are strictly monitored and reconciled on regular basis. The Company manages liquidity risk by maintaining maturities of financial assets and financial liabilities and investing in liquid financial assets. Further, the Company manages liquidity risk as follows:

- The Company's liquidity risk policy which sets out the assessment and determination of what constitutes liquidity risk for the Company. Compliance with the policy is monitored and exposures and breaches are reported to the Company risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
- Guidelines are set for asset allocations, portfolio limit structures and maturity profiles of assets, in order to ensure sufficient funding available to meet insurance and investment contracts obligations.
- Contingency funding plans are in place, which specify minimum proportions of funds to meet emergency calls as well as specifying events that would trigger such plans.
- The Company's catastrophe excess-of-loss reinsurance contracts contain clauses permitting the immediate draw down of funds to meet claim payments should claim events exceed a certain size.

The table below summarizes the maturities of the Company's undiscounted contractual obligations relating to financial assets and liabilities as at 31 December 2025 and 2024.

Financial assets	**Less than 12 months**	**More than 12 months**	**Total**
Financial assets at fair value through profit or loss ("FVTPL")	**250**	**-**	**250**

To manage the liquidity risk arising from financial liabilities mentioned above, the Company holds liquid assets comprising cash and cash equivalents and investment securities. These assets can be readily sold to meet liquidity requirements.

The assets with maturity less than one year are expected to realize as follows:

- Fair value through profit or loss investments includes investments in mutual funds and Murabaha placements and are held for cash management purposes and expected to be matured/ settled within 12 months from the balance sheet date.
- Term deposits classified as includes deposits placed with high credit rating financial institutions with maturity of less than twelve months from the date of placement.
- Cash and bank balances are available on demand.
- Reinsurers contract assets mainly pertain to property and casualty segment and are generally realized within 6 to 9 months based on settlement of claims.

The liabilities with maturity less than one year are expected to settle as follows:

- Reinsurers contract liabilities are settled on a periodic basis as per terms of reinsurance agreements.
- Majority of insurance contract liabilities are expected to be settled within 12 months in accordance with statutory timelines for payment. Property and casualty policies due to the inherent nature are generally settled within 12 months from the date of receipt of loss adjustor report.
- Accrued expenses and other liabilities are expected to settle within a year of 12 months from the year end date except for end of services benefits.
- Surplus distribution payable is to be settled within 6 months of annual general meeting in which financial statements are approved.

29. Capital management

Objectives are set by the Company to maintain healthy capital ratios in order to support its business objectives and maximize shareholders' value.

The Company manages its capital requirements by assessing shortfalls between reported and required capital levels on a regular basis. Adjustments to current capital levels are made in light of changes in market conditions and risk characteristics of the Company's activities. In order to maintain or adjust the capital structure, the Company may adjust the amounts of dividends paid to shareholders or issue shares.

The Company manages its capital to ensure that it is able to continue as going concern and comply with the regulators' capital requirements of the markets in which the Company operates while maximizing the return to stakeholders through the optimization of the debt and equity balance. The capital structure of the Company consists of equity attributable to equity holders comprising paid share capital, reserves and retained earnings.

29. Capital management (continued)

As per guidelines laid out by Insurance Authority (IA) previously known as SAMA in Article 66 of the Insurance Implementing Regulations detailing the solvency margin required to be maintained, the Company shall maintain solvency margin equivalent to the highest of the following three methods as per Insurance Implementing Regulations:

- Minimum capital requirement
- Premium solvency margin; or
- Claims solvency margin

The equity as at 31 December 2025 consists of paid-up share capital of SR 400 million, accumulated losses of SR 451.84 million, fair value revaluation reserve of SR 70.8 million and remeasurement reserve of employees' benefit obligations of 5.62 million (31 December 2024: paid-up share capital of SR 400 million, accumulated losses of SR 195.62 million, fair value revaluation reserve of SR 59.20 million and remeasurement reserve of employees' benefit obligations of 4.73 million), in the statement of financial position.

As of 31 December 2025, the solvency margin calculated in accordance with Article 66 of the Implementing Regulations of the Cooperative Insurance Companies Control Law shows a significant deterioration, resulting in a negative position. This indicates that the Company has not complied with the regulatory requirement to maintain the minimum solvency margin prescribed under the said Article.

The amendment made to the Co-operative Insurance Companies Law in accordance with the Royal Decree (M/12) dated 23/1/1443H (corresponding to 1 September 2021) requires the minimum capital of insurance companies to be SR 300 million by 15 December 2024.

In the opinion of the Board of Directors, the Company has fully complied with the externally imposed capital requirements as of 31 December 2025.

30. Gross written premium

Details relating to gross written premium are disclosed below to comply with the requirements of IA and are not calculated as per the requirements of IFRS 17.

For the year ended 31 December 2025

Breakdown of GWP	**Medical**	**Motor**	**Others**	**Total**

Reinsurance premium ceded – globally (including excess of loss)	(9,330)	(18,677)	(406,414)	(434,421)
Reinsurance premium ceded – locally (including excess of loss)	(5,943)	(3,839)	(40,515)	(50,297)
Net written premium - total	83,173	583,516	5,285	671,974

32. Surplus distribution

As required by the Implementing Regulations and the By-laws of the Company, surplus arising from the Insurance Operations is distributed as follows:

Transfer to Shareholders' operations	90%
Transfer to Policyholders payable	10%
	100%

In case of deficit arising from insurance operations, the entire deficit is allocated and transferred to shareholders' operations.

The surplus payables to policyholders for the year 31 December 2025 amounts to SR nil (2024: SR: nil)

33. Operating segments

A segment is a distinguishable component of the Company that is engaged in providing products or services (a business segment), which is subject to risk and rewards that are different from those of other segments. Segment performance is evaluated based on profit or loss which, in certain respects, is measured differently from profit or loss in the financial statements.

The Chief Executive Officer of the Company monitor the results of the Company's operations and have been identified as the Chief Operating Decision Maker (CODM). The net results of the Company are reported to the Board of Directors, for the Company as a whole. Furthermore, the Company operates in one geographical area i.e. Kingdom of Saudi Arabia.

Accordingly, segmental analysis of the statement of income and other comprehensive income and statement of financial position is not carried out as the CODM considers the Company to be a single operating segment based on the nature of its operations and products. However, the Company has disclosed its insurance related balances/results by product lines, which are determined based on the disaggregation principles of IFRS 17. These include insurance contract liabilities/assets, reinsurance contract assets/liabilities, insurance service results and insurance finance income/expenses are as follows:

34. Commitments and contingencies

	31 December 2025	31 December 2024
Letters of guarantee issued in favour of ZATCA	**-**	22,096
Letters of guarantee issued in favour of non-government customers	**400**	300
	400	22,396

a. The Company has capital commitments outstanding as at 31 December 2025 amounting to SR 5.5 million (31 December 2024: SR 16.61 million) in respect of software development project.

b. As at 31 December 2025, the Company's bankers have given guarantees to non-government customers amounting to SR 0.4 million (2024: SR 0.30 million) in respect of motor insurance.

c. Refer note 23 for contingencies pertaining to zakat and income tax assessments.

d. The Company is subject to legal proceedings in the ordinary course of business. There was no material change in the status of legal proceedings as at 31 December 2025 with those as disclosed in the annual financial statement for the year ended 31 December 2024.

35. Subsequent events

Subsequent to the reporting date, The Company terminated the MOU and all negotiations related to the Proposed Merger with Arabia, based on the mutual agreement by the parties on 04 March 2026 (Corresponding to 15 Ramadan 1447H). (refer to note 1).

Subsequent to the reporting date, on 19 February 2026, IA has issued a decision to suspend the Company from issuing or renewing insurance policies for all motor vehicle insurance products including comprehensive vehicle insurance policies due to non-compliance with certain regulatory requirements primarily related to the Company's liquidity, and settlement mechanisms for payables to policyholders and others.

Subsequent to the year ended 31 December 2025, In March 2026, geopolitical instability in the Middle East Region increased which may have an impact on all the regional countries. The Company's management is closely monitoring the geopolitical developments and has determined that these developments are non-adjusting events and no adjustments to the financial statements are required. While the Company's financial position remains unaffected at present, management continues to assess the potential for future impacts on its business.

Subsequent to the year end, On 14 April 2026, The Company had announced sthat it had received a "No Objection Letter" from the Insurance Authority to utilize the statutory deposit held in favor of the Authority, amounting to SR 60 million. This action will contribute to preserving the rights of shareholders, policyholders, and creditors, and to enhance the Company's efforts to maintain the continuity of its operations.

There have been no significant subsequent events since the year end, that would require disclosures or adjustments in these financial statements.

36. Approval of the financial statements

These financial statements have been approved by the Board of Directors on 26 April 2026 corresponding to 10 Dhu'l-Qi'dah 1447H.

Supplementary information

As required by the IA Implementing Regulations, the statement of financial position, statement of income and statement of cash flows are separately disclosed for both insurance operations and shareholders' operations as follows:
